# UI notes:

General:
- Dont resize the window- its not responsive
- Don't choose dark mode

Question Form:
- Fill the tabs in order, left to right, each tab depend o the previous tab
- Dont create question that solution will take more than 15 seconds to complete, and dont provide test cases with heavy sized variables
- **I planned to support void type but its not supported so don't choose it,**
- **As well as tree with null like [1, null,2]- not allowed**
- **Also dont create nested data types, use composite types with Integer inside only!**
- **I started to add Java language, but i didnt finish.. Dont use Java,**

1   **2**   **3**

Code editor:
Use only build-in language features
Your solution will run in a job which means-
job.yaml limitations:
- Wont execute more than 30 seconds
- Solution saved in ConfigMap- file size cannot exceed 1mb
- Limited memory and cpu

```yaml
limits:
            memory: "128Mi"
            cpu: "200m"
```

Issued i addressed:
- user throws errors,
- user prints and clutter the logs

Issued i still haven't address:
- Large files
-
