

Email for your university government affairs office

Subject: Could your office help coordinate outreach on NSF SBE funding?

Hi [Name],

I'm part of a small group of faculty/researchers at [University] concerned about FY2027 funding for NSF's Social, Behavioral and Economic Sciences Directorate.

We are hoping to request a brief meeting with [Senator/Representative]'s office to explain why SBE research matters to our university, our students and trainees, and the broader [state/district] community. I wanted to ask whether your office would be willing to advise us on the best way to make that request and, if appropriate, help coordinate it.

If helpful, our goal is to keep the message focused on the university's research, training, and local impact. We would also welcome guidance on who should be included, how best to frame the request, and whether someone from your office might want to join the meeting.

Thank you very much,
[Your Name]
