I am a dedicated frontend developer specializing in creating efficient, responsive, and user-friendly websites. My recent work includes building seamless user interfaces with Next.js, ensuring a flawless experience across devices. I stay up-to-date with the latest web technologies and trends, aiming to deliver high-performance solutions that enhance user engagement. With a strong focus on detail and creativity, I am ready to bring innovation and efficiency to your next project.

AREAS OF EXPERTISE

- React/Next.js.
- Responsive Design.
- Bootstrap, Tailwind & Material UI.
- Git & GitHub.
- RESTful APIs.
- NextAuth.
- Unit Testing.
- State Management Zustand/Redux.
- Performance Optimization.

PROJECT EXPERIENCE

Mobiverio Digital Agency

Frontend Developer

Abuja, Nigeria.

April 2022 – Present

- Developed a user-friendly e-commerce website using React for the UI, leading to seamless user engagement.
- Implemented efficient state management with Zustand, reducing page load times and enhancing the overall user experience.
- Integrated Axios for seamless API requests, resulting in a faster checkout process and a 20% increase in conversion rates.
- Styled the website with Tailwind CSS, improving design consistency and responsiveness, which contributed to a 35% decrease in bounce rates.

TechTink

Frontend Developer Intern

Abuja, Nigeria.

March 2024 – July 2024

- Designed the user interface using a code template, resulting in a streamlined HR system with a 70% reduction in development time.
- Styled the application with Material UI, enhancing visual appeal and consistency, which improved user satisfaction.
- Implemented state management with Redux and Redux Toolkit, optimizing data flow and reducing state management issues by a significant degree.
- Configured Axios for API requests, leading to a faster data retrieval process and a 20% improvement in overall system performance.

TIIDELab

Frontend Developer

Abuja, Nigeria.

July 2023–Dec, 2023

- Collaborated with team members to implement best practices in coding and version control, laying a strong foundation for my journey as a professional developer.
- Reviewed and maintained code quality for Bitmedics, a health management system, ensuring high standards and reliability within the project.
- Managed the GitHub repository for a team of 12, facilitating smooth collaboration and efficient integration of code.
- Developed key components using vanilla JavaScript and React, enhancing the application's functionality and user experience.
