

Tab 1

**PARAMETER A. RESEARCH,
STRATEGY AND CAPACITY**

0.2 The research program contributes to the development of the community/nation by the economic benefits derived by the internal clientele.

O.2 The research program contributes to the development of the community/nation by the economic benefits derived by the internal clientele.

Research	Beneficiaries	Benefit
Value Chain Analysis of Calamansi in Partido Area	Lagonoy Calamansi Farmers Association (LACAFAS)	<p>The research findings of the study served as the baseline data for the project proposal titled Shared Service Facilities of the University in collaboration with the Department of Trade in Industry. Various machineries, facilities, production equipment, and fixtures were transferred to PSU from the DTI to serve as Shared Service Facility (SSF) for calamansi farmers including middlemen, and manufacturers.</p> <p>The findings also served as input in drafting a memorandum of agreement for cooperatives and organizations of the calamansi industry in the district. The Lagonoy Calamansi Farmers Association (LACAFAS) is utilizing the SSF thus promoting economic development of calamansi in the Partido district.</p>
<p><i>Expansion of e-SITIO: A data driven approach Towards transformative Local Governance</i></p> <p>Study 3. e-SITIO Heuristic Evaluation and Usability Testing using the ISO 25010-2011 Quality Model</p>	LGU Goa	<p>This examines the implementation and impact of expanded e-SITIO (Electronic system for Interconnected Transformative Information on Demand) in Goa, Camarines, a digital platform designed to enhance public financial management through real time data driven decision making</p>
