

Plugin name: Houses

Version: 1.8 Spigot

Dependencies:

Worldedit

Worldguard

(im guessing vault)

What it does: This plugin allows players to rent worldguard region setup by clicking a sign

Functions:

/house find (Allows a player to teleport to a region rent sign that is for rent)

permission: House.find

/home (Teleports the player to their rented region)

Permission: house.home

/homegui (access the home gui by command)

Can only be opened if you are renting a region currently

/house sethome {region} (Sets a house region teleport location)

house.admin.sethome

Permissions for number of players u can add to your home

House.add.0 (only you can be in the home)

House.add.1

House.add.2

House.add.3

The empty slots in the add player gui lists all online player heads. You can click on them to add them to your home which adds them as a member of the region as well

Sign format (What to type on a sign to put it up for rent):

[rent]

{region}

{time}

{price}
