# Meeting Summary for Public AI Seminar (2024/10/8)

The following notes were generated by Zoom and lightly edited to remove names and other attribution. Al-generated content may be inaccurate or misleading. Always check for accuracy.

# **Quick Recap**

The team discussed the potential of AI to revolutionize various aspects of human culture, including science fiction, social media, and human intimacy. They emphasized the need for responsible AI development, with a focus on prioritizing public benefit over private profit, and the importance of updating values, laws, and rights to account for AI's impact on smaller communities and languages. The team also explored the implications of AI on job displacement, the need for global social coordination, and the potential of AI to revolutionize game theory and negotiation.

# Summary

# **Exploring AI and Creative Professionals**

The discussion started with a conversation about upcoming conferences and the possibility of inviting creative professionals, such as a notable science fiction author and an artist who focuses on AI and crises, for future seminars. There was also mention of a recommendation for the artist who works with installation art related to AI. Insights were shared on how technological changes could make science fiction obsolete, which sparked interest in a talk on the AI dilemma by a co-founder of a center for humane technology.

#### Al's Impact on Culture and Society

There was a focus on how AI is increasingly influencing human culture, with concerns that generative AI might lead to undesirable consequences like democratic backsliding. The need to ensure AI serves public benefit rather than private profit was emphasized, alongside the importance of updating values, laws, and rights to consider AI's impact on smaller communities and languages. The idea of banning business models that commodify human attention was raised as a critical issue.

# Social Media, AI, and Human Intimacy Implications

The conversation shifted to the implications of AI and social media on human intimacy. There were concerns about the balance between private benefits and public harms in social media and how AI technologies could intervene in human behavior. A suggestion was made that AI agents interacting closely with humans should have fiduciary duties, akin to doctors or lawyers. Legal privileges for certain AI agents were also discussed, and the concept of the "extended mind" was mentioned, suggesting that AI could become an extension of our bodies.

# Al's Impact on Jobs and Global Cooperation

The rapid advancement of AI and its potential to displace jobs was discussed, with a call for humans to adapt. The need for global coordination to solve the challenges posed by AI was emphasized, with hope expressed for more global cooperation in the future.

## Al Governance and Social Media Concerns

There was excitement about the potential of AI to enhance collaboration by revolutionizing game theory. However, frustration was expressed over the lack of progress on addressing social media harms and data privacy. Ideas such as a public Apollo mission for AI governance and a quadratic compute tax to align companies with democratic values were proposed. The need for more resources for nonprofits working on AI governance was also highlighted.

## **Quick Action on Narrative Projection and Al**

The need to act quickly in projecting a narrative about AI using creative collaborators was emphasized. Discussions covered the implementation of AI in legislative bodies and addressing concerns through clear workflows. A speculative fiction project was proposed to explore societal values, possibly in collaboration with authors.

#### Addressing Climate Change and Al Governance

There was an urgent discussion on the need to take action on climate change, with emphasis on the importance of infrastructure development and carefully using fear to engage the audience. Three policy goals for public AI were proposed: promoting infrastructure policy, realigning financial incentives in the AI market, and securing public funding to steer AI development. Concerns about profits being prioritized over privacy and a suggestion to explore a care economy model were also mentioned.

## The Al Dilemma: Documentary Creation and Distribution

The creation of a documentary titled "The AI Dilemma" was proposed. Discussions centered on recruiting a well-known documentary player and framing the conversation around daily life experiences. There were concerns about distribution issues with a previous documentary, and possible reasons for its challenges were speculated. The team agreed to continue the discussion asynchronously, and anticipation was expressed for the next seminar on AI Nationalism.
