The main text should be written using Times New Roman, 10pt, fully justified. Italics can be used for emphasis and bold typeset should be avoided.

2.1 Headings, tables and figures

Headings. Please follow the formatting instructions for headings given in Table 1.

Tables. All included tables must be referred to in the main text and the table title and caption are to be positioned above the table. The captions need to be written in Times New Roman, 9pt.

Table 1. Table title. Table captions should always be positioned *above* the tables.

Heading level	Example	Font size and style
Title (centered)	EAI Core	16 point, bold
1 st -level heading	1 1st level	12 point, bold
2 nd -level heading	1.1 2nd level	10 point, bold
3 rd -level heading	Headings. Text follows ...	10 point, bold
4 th -level heading	<i>Remark.</i> Text follows ...	10 point, italic

Figures. Figures need to be inserted separately as a .jpg or .png file and must be referred to in the text, for an example see **Figure 1.** [1] Figure descriptions should be placed below the figure and written in Times New Roman, 9pt.

Fig. 1. Architecture of a typical wireless sensor node.

2.1 Equations, formulas and code

Equations and formulas. All equations and formulas should be referred to in the text using consecutive numbers in parentheses, see equation (1) and (2) for an example. Displayed equations or formulas should be centered and set on a separate line with an extra space above and below. They should be numbered for reference and the numbers should be consecutive, with numbers enclosed in parentheses and set on the right margin.

$$ax + by = cd \quad (1)$$

$$(x + a)^n = \sum_{k=0}^n \binom{n}{k} x^k a^{n-k} \quad (2)$$

Equations and formulas should be punctuated in the same way as ordinary text but with a space before the punctuation mark.

Code. Program listings or commands in the text are set in typewriter font (CMTT10 or Courier) and referred to in the text.

Example of a Computer Program from Motaz Abdel A., (2013) Start programming using Object Pascal. Legally Free Computer Books, US.

```
program Project1;  
  {$mode objfpc}{$H+}  
uses  
  {$IFDEF UNIX}{$IFDEF UseCThreads}  
  cthreads,  
  {$ENDIF}{$ENDIF}  
  Classes { you can add units after this };  
  {$IFDEF WINDOWS}{$R project1.rc}{$ENDIF}  
begin  
end.
```

2.2 Citations and references

Citations. For citations in the text use consecutive numbers in square brackets: [1], [2], [3], [4], etc.

References. All references must be in the same format as the ones at the end of this document and the reference list must include all cited literature.

2.1 Footnotes and acknowledgements

Footnotes. Footnotes should be mentioned in the text.¹ The superscript numeral used to refer to a footnote appears in the text either after the word to be discussed or following the punctuation mark.

Acknowledgments. The heading should be treated as a 3rd level heading and should not be assigned a number.
