

Adding a Remind 101 Widget

To add a Remind widget that will automatically update when you post to Remind, follow these steps...

1. Log in to remind.com.
2. Click the drop-down at the top left of the page.
3. Choose Account Settings.

← Back

4. Select "Widgets."
5. You will then have the option to "Copy Code" for any one of your classes, or ALL classes. Click the button next to your choice to copy the code.
6. Log in to iBlog.

7. Select the site on which you would like to insert the widget.
8. Go to your site's dashboard.
9. Select "Appearance", then "Widgets".
10. Find the Widget called "Custom HTML". Drag this widget onto the block entitled "Sidebar 1".
11. When the widget editor opens, PASTE the code from Remind into the text editor and give it a title.
12. Click "Save".
