

Parent University: Cochlear Implants: Myths and Facts

Video - <https://www.youtube.com/watch?v=OcCTzZcS4vE>

True	False	Cochlear implants fix hearing loss and the individual will function like a hearing person.
True	False	Even with a functioning cochlear implant, the ability to detect, discriminate, and make sense of sound varies by individual.
True	False	Students with cochlear implants may need to have an Individual Education Plan (IEP), 504 Plan, or Early Intervention Individual Family Service Plan (IFSP).
True	False	Students who have a cochlear implant don't need accommodations, modification, interpreters, etc.
True	False	People with cochlear implants are not accepted into the Deaf Community or considered to be a part of Deaf Culture.
True	False	Having a cochlear implant requires ongoing intensive Auditory Verbal therapy and training to teach individuals how to make sense of what they hear.
True	False	Some cochlear implant users develop full listening and spoken language skills, some have limited benefit and continue to rely on visual information, and some even choose to stop using the cochlear implant because they do not experience adequate benefits.
True	False	Individuals who have cochlear implants don't use sign language.
True	False	Utilizing multiple modes of communication help expose children to language and will aid in the development of a fuller vocabulary.
