

Maine Forest Collaborative

Preparing students to actively contribute to the vitality of our forest communities today and in the future

MARCH COHORT EVENT

Session 2 PREP: Examples of Problem Solving

In this session, you will be listening to a working professional from Maine. They will describe how they answer questions or solve community challenges through their work. They will also give a description of their working experience. It will help to have a few questions prepared ahead of time.

EXPERTS TO COME...

Before March Cohort

Research the professional(s) that you signed up to listen to. What questions do you have for them? Think of questions that could help you in your career search.

March

Take notes! What caught your attention? What questions come up as you listen? Does any information help you in your career search?

After March Cohort

Discuss your experience with your class. Did anyone learn something that could also benefit you? What did your class take away from this cohort day?
