

Whiplash: Family Guy Funnies

Yes, i really do like the beta ep1 Popcorn render, and i really like the render combo used from TN's 2-4 Comedy, a thing that's butter to an Object Shows bread, but I guess the OSC doesn't really like buttered toast that much cause there's so many serious ones! It's nice to take a break occasionally, and these 2 host some pretty decent stuff for a comedy

App, the gay-enby host of Battle for Palace Objects Reloaded!

Popcorn, the host of the group project, Showvember!

So, Chuck vs Sunflower was alot, infact, for those who dont know, its in Limbo now (due to lack of time for it & minor burn-out), but I wanted to make a blog still, so I thought of something I both: actually enjoy, & something I can get access to research without piracy, and now we're here

Anywho, im Rocky, and im gonna do the thing on WhipLash!

anywho, imma try something new... also I learned how to use Overlay in Ibispaint so it looks good now

Background

Note: these will be more show focused since there isn't much to talk about with these characters, but character related stuff will still be mentioned

App

"I hate the world and I wanna blow it up!!!" -App, BFPOR 6

Once upon a time, in this world, somewhere in the 2010's, a little lad by the name of Woopdoo would soon make a little show, that show...was called Battle for Palace Objects Reloaded! The show was made to be something she wanted from a cartoon, a deconstruction on already built rules, a world that she made, and a cast voiced by her best friends! And that all happened in...honestly, a pretty decent show!

Anywho, now onto the..actual show, basically, App just kinda, showed up, cause they wanted to host the greatest Object show ever! And the contestants just agreed to that (do y'all realize why I never did backgrounds before in my blogs), so, then the competition started, in ep1, they had to save Frosting since Gamesphere kicked her to the Sun! And in ep2, we had a co-host! That being Chronic the Burger! Aka, Apps Boyfriend, but then...disaster strikes! McNugget ate Chronic! Oh dear!! So, App set the challenge to save Chronic!

But then, literally no one did the challenge, a lot of them just sat around, & the ones that didn't literally had no idea what to do, so then they waited for App, in a single spot, for 6 years, I mean 6 real life years

After 6 whole years, the contestants decided to just stop sitting down, & actually got up & started a manhunt! But then App came back, brought everyone back, & had even brought 2 new co-hosts, Golden Jimmy & Silver Alvin! These 2 wouldn't be eaten thankfully, but they did host their own show, The Fifty Minutely Object Show! But that's a story for another day

Anywho, then we had a Gameshow, a Publah Caretaking challenge, and even a challenge to Save Christmas & get App a new man! That last one failed horribly, but whatever

Uhm, thats it for App's background, but whatever

Popcorn

“Your final challenge is to stop me from killing myself” -Popcorn, Showvember 10

Once upon a time, just, like, 4-ish years ago, a group of friends that were big in the OSC wanted to do something together, infact, they've been trying for 5 whole years!, then a little lad by the name of Webzforevz suggested the idea of an Object Show where they'd each do an episode in which they'd release it weekly, it was suggested as a joke, it very quickly wasn't a joke, the idea quickly grew to have it so that everyone still made an episode, but all they had to work with was the contestants, host, & the elimination order, everything else was up to them

Now im supposed to write about what happens in the show and its story or whatever, but Showvembers gimmick is that the story is different every episode, so ill skip to s2

S2 starts off at...Popcorn's funeral!? (Dun dun), oh wait shes alive, lol, s2 is more of the same except the contestants are different, we only got up to 10 episodes since Highvan (the person who was supposed to do ep11) was in Ukraine, and since it was 2023...I think you can connect the dots, thankfully they're ok now, but their main priority rn is The Historical And Nice Object Show ep2, so no more Showvember ig

My Object Show host has this!? What a shock!

Dimension Hopping / Creation / Deletion

App can make Dimensions, they made an elimination place, a gameshow stage, & a marathon race track thing

They can also delete those worlds, but the people inside won't be deleted

App has access to the following dimensions/sets:

- The Mainland- the main island where the show takes place, has a bunch of not notable places
- Elimination Area- a pink void with a TV screen & platforms for everyone, where the elimination takes place
- Gameshow Stage- its a Gameshow stage, you answer questions & do stuff, has a bunch of things that kill those who get questions wrong

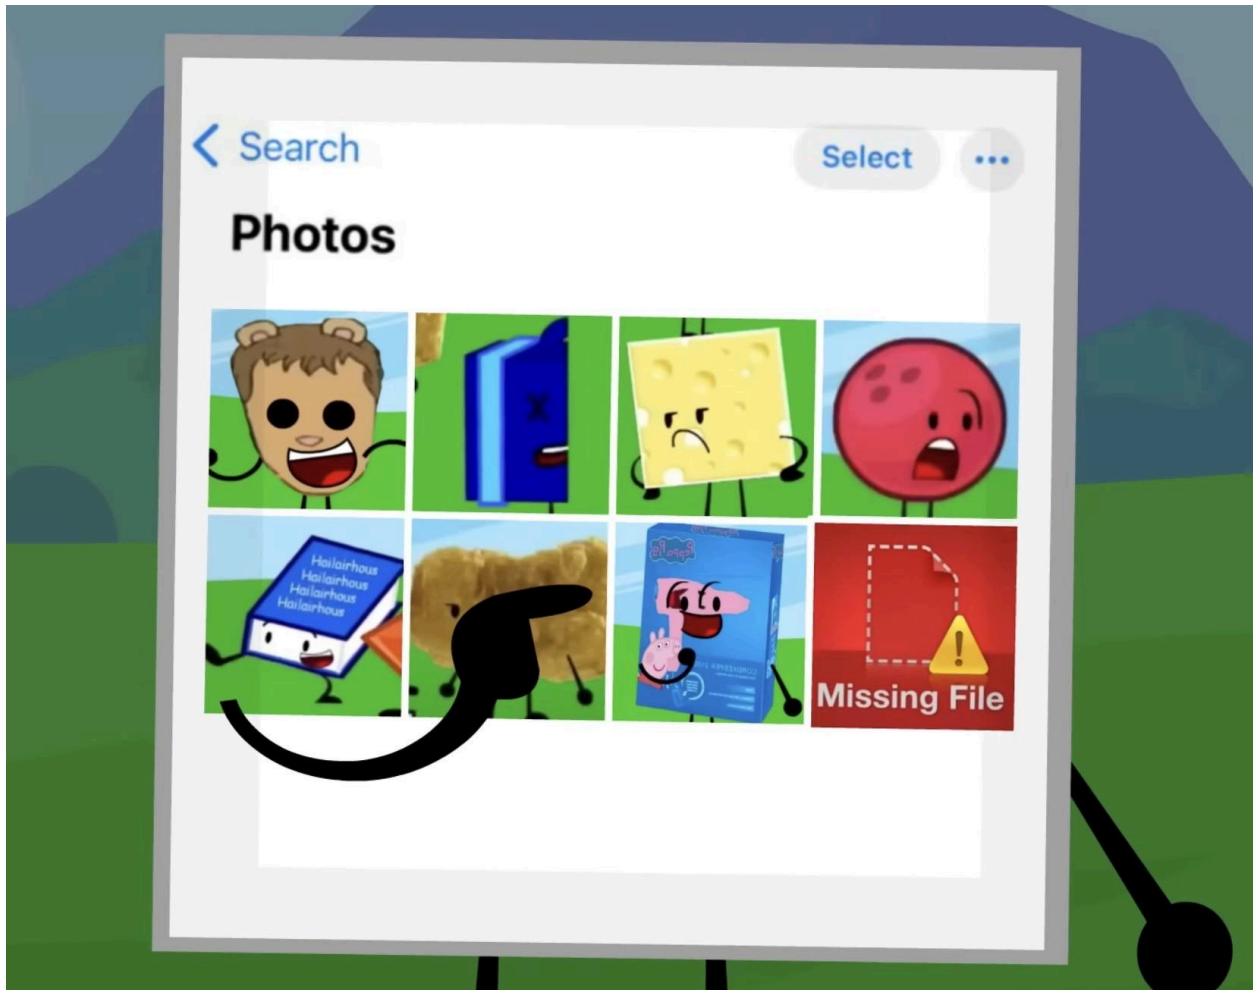

- Marathon Track- its a marathon track, Hailairhous was left there & App deleted the verse, Hailairhous is still alive tho
- Hell- while App didn't create it, he still has access to it (via the portal used to kidnap Golden Jimmy)

Shapeshifting

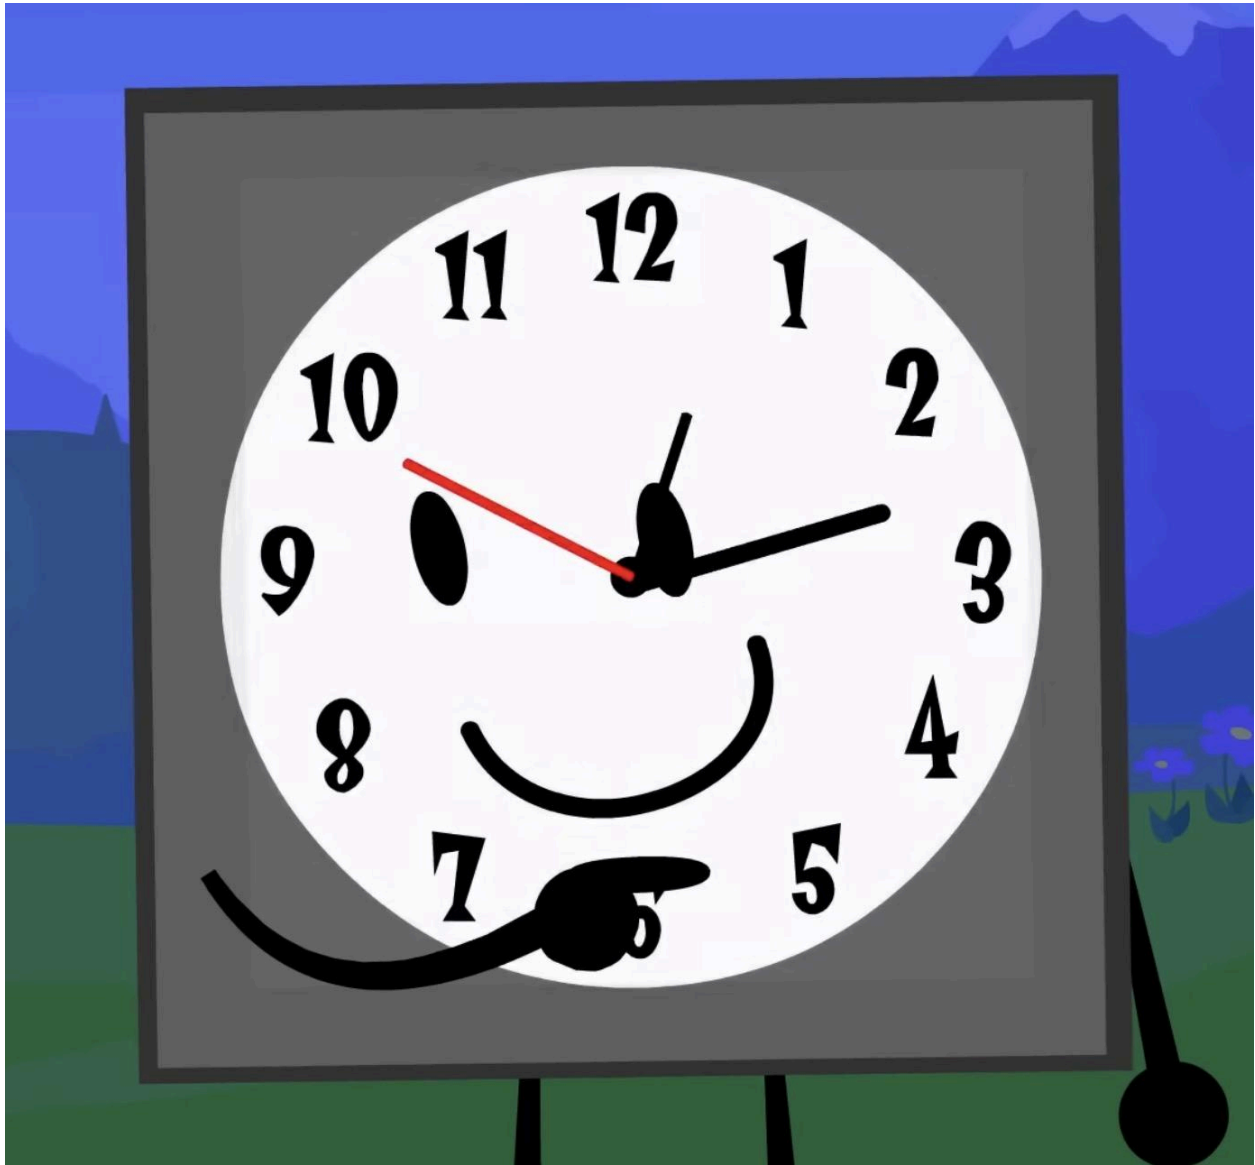

App's asset turned into McNugget for, like, a second

Recovery

App can recover people, need I say more?

Clock App

Flight

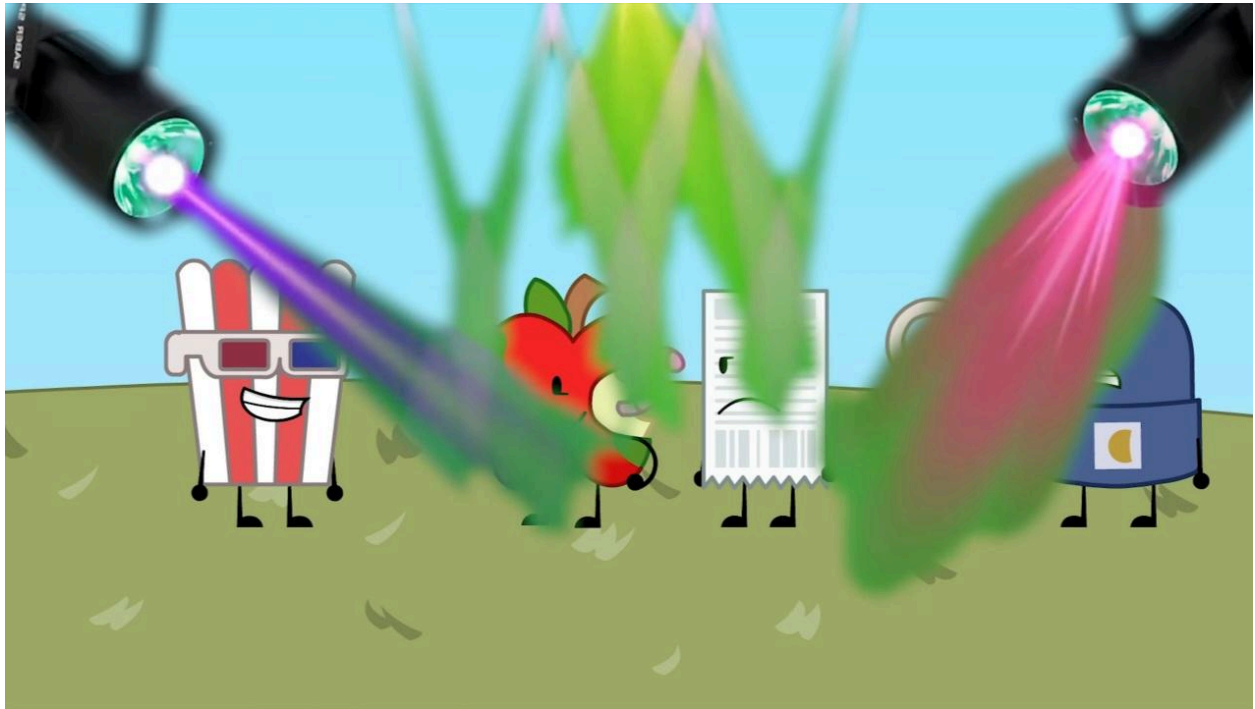

up up and away!

Immortality

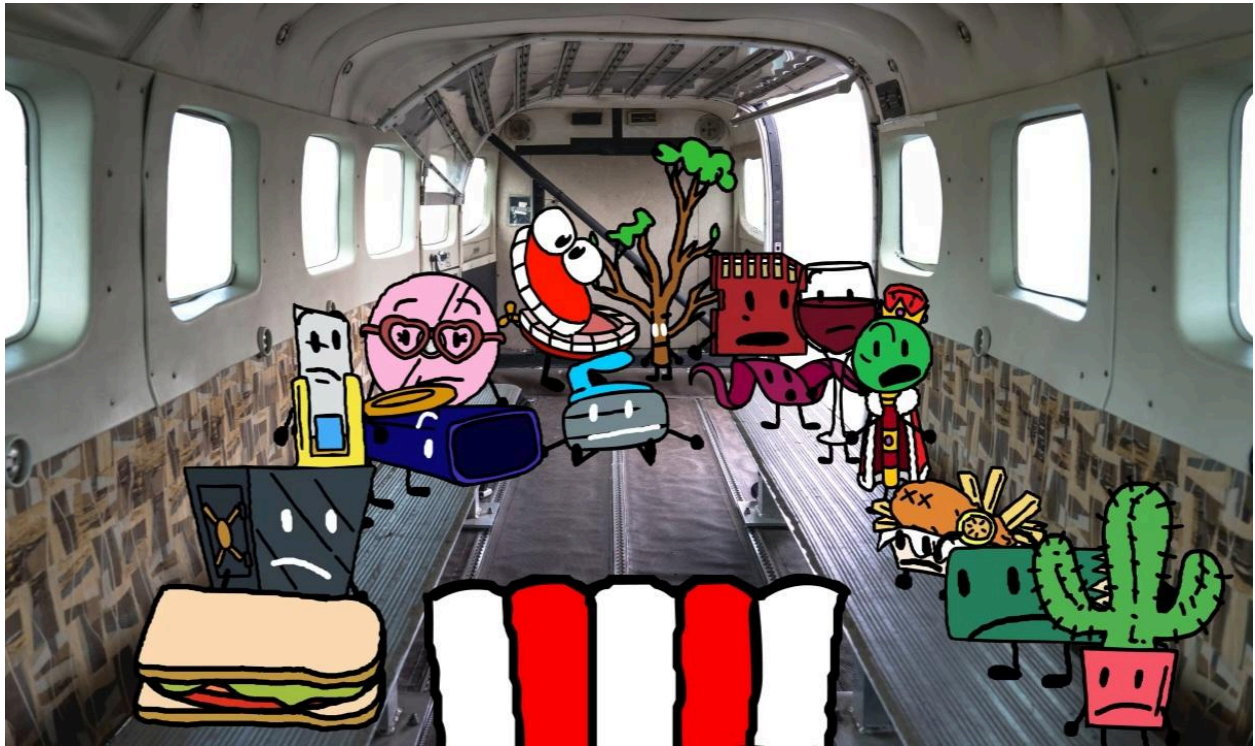

Via...whatever is behind that door, Popcorn can come back from the dead, how queer!

Used To eliminate Chatterbox

Body Manipulation

She Removes exactly 2% of the body of a contestant if they get a question wrong

Existence Erasure

App's clone, made for the first actual challenge as a live audience, should be safe to assume they have all the same abilities as App

Publahs

Publahs are these weird...among us looking creatures that kinda reminds me of those pets from Talking Tom 2, anyone remember that?...anywho, there are 5 of these fellas (Nothings Prize, & the 4 Publahs that were given out for the challenge in ep5)

Nutty

Just Nutty, they're a minor character that appears every once in a while

Abilities-

- [Nutti-fication](#)

Guards

Some guards from s2 ep4, they chased & beat up SOAG

Popcorn Jr

Popcorn's son, he set fire to Safe House with Curling Stone & blamed Curling Stone for it, later got killed by Curling Stone by putting Junior in a pot & cooking him alive, then was later fed to App, who spat him out & automatically eliminated Chatterbox, who got framed

Things of Note

Should App get the Contestants?

While You could Argue that App gets all the Contestants (minus Sherbert since he was basically erased from the cast after his creators controversy) since there's nothing stopping App from just teleporting the Contestants & having them deal with Poppity Corn

I decided not to include them since I dont think its standard, yall can correct me if im wrong though, this is the first time I've really dealt with something like this

Uni App?

Ok, This is pretty straight forward: App makes Dimensions, so they're uni

I buy this, no doubt about it, he even [deletes the Marathon Track from existence](#)

And before anyone says that the track doesn't equal uni, [the elimination spot is quite literally an endless pink & purple void](#), and App could definitely delete that from existence if creating it wasn't enough evidence somehow

Tldr: App is universal cause they create & destroy realms they made

Can Popcorn clone?

No, no evidence backing it up, I almost included it but decided against it

Uni Popcorn?

Ok, Unlike App, this is a lot dumber & stupid

Basically, the idea is that every Episode of Showvember is a different universe, & Popcorn somehow scales to that

Yes, it's as bad as you think it is, and yes, im not buying it

Can App delete Popcorn?

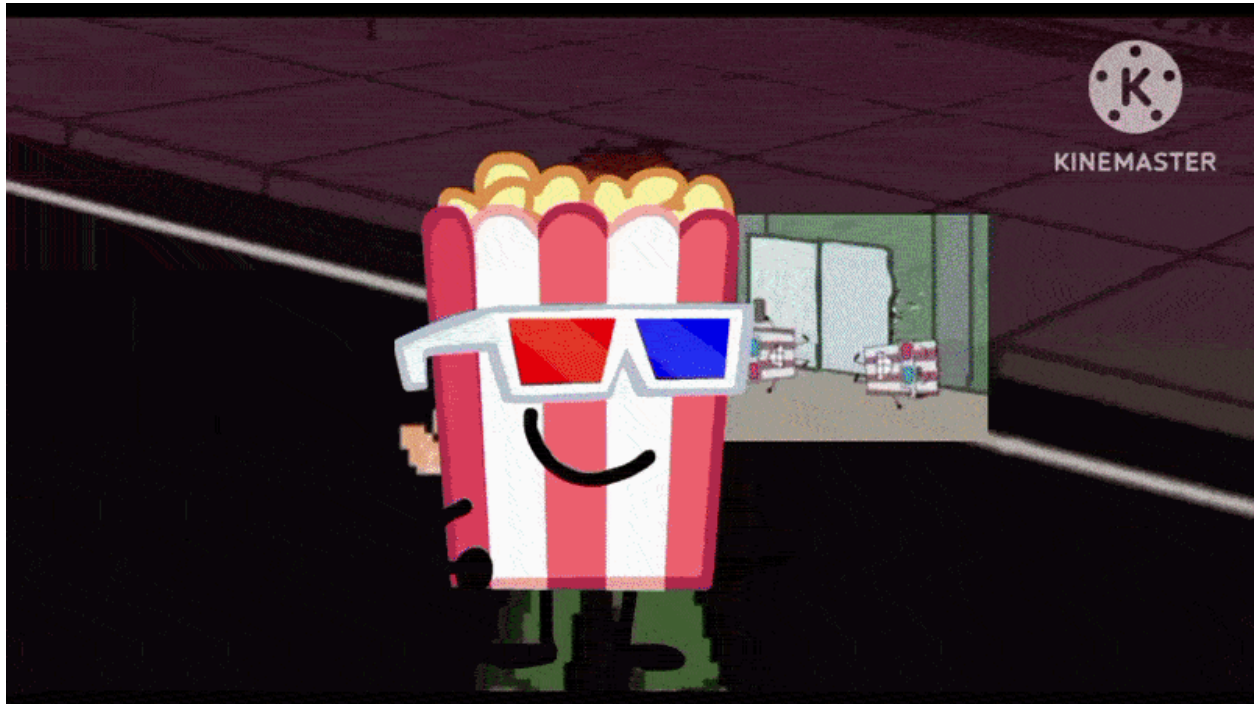

Simple answer: No

Long Answer: no, the things that can be deleted need an Icon, App does not have an icon for Popcorn, and it would be very unlikely that they'd make an icon for them mid fight

As for if Popcorn is able to delete App, yeah, they can straight up wipe them from existence

Can App counter Popcorns Recovery Machine?

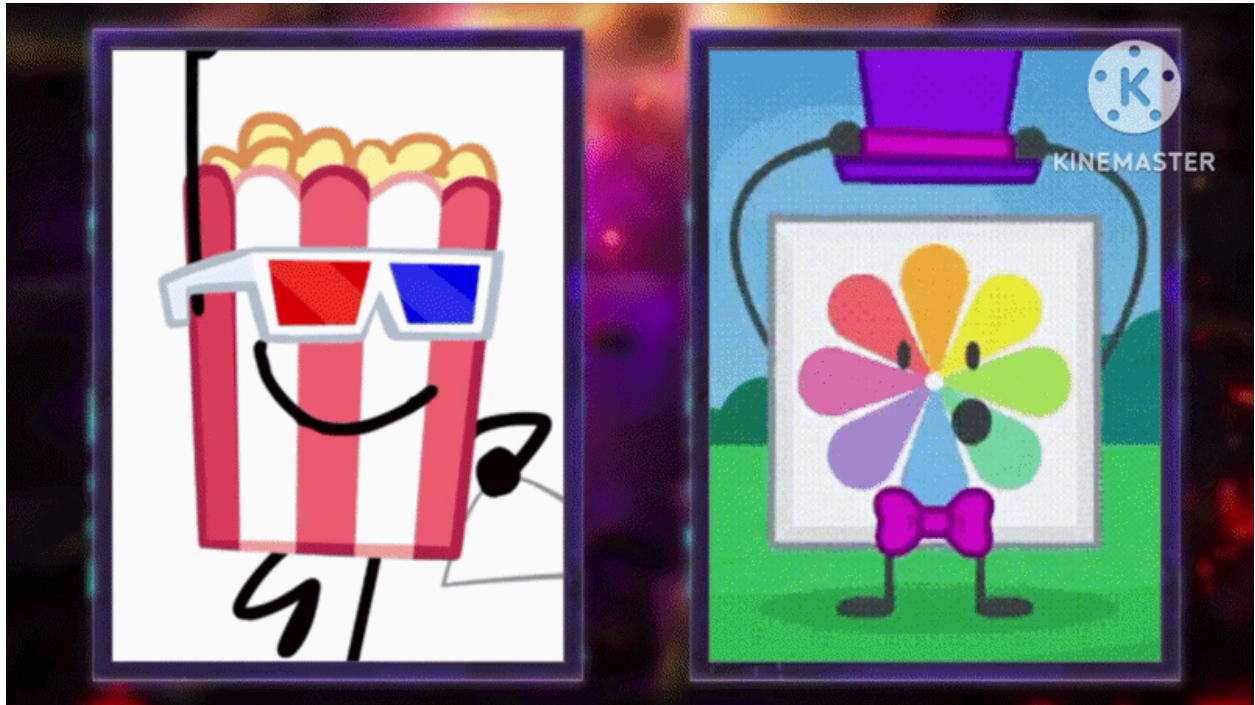

Ignore the GIF, it doesn't spoil the verdict... actually don't I spent way too much time on this GIF

....well...drumroll

please....dadadadadadadaddaaddadadadaffafafadadadadaddadadaaddaaddafadaddadadada
dadadaddadadadadadadadaddadadadadadadadada....MAYBE! Well, App could just, destroy it,
or, with his dimension stuff, just be in a different dimension than Popcorn, so the fight can't
continue (considering Popcorn cant dimension hop)

Tldr: App might be able to since he could just destroy it or be in a completely different dimension

Verdict

Alright Folks, the research is done, my thoughts aren't made up, and now its time for a WhipLash!!!!.....Verdict!

This part will be split into 6 categories: Strength, Speed, Durability, Arsenal, Weapons, & Outside Help, anywho, lets get into this...thing

Stats

Im gonna crush 3 birds with 1 stone, so whatever

Anywho, first we have strength, which we have an obvious pick for, App can make Dimensions, so they're obviously get this

Even if you somehow don't buy Uni App, Gamespheres Sunkick is still better than anything Showvember has pumped out (star BFPOR [without Uni App] to Moon level Showvember)

App takes Strength

As for Speed, this also has a clear winner, Popcorn takes this easily, BFPOR doesn't really have Speed Feats, and [this feat](#) performed by Beanie is more than enough to make up for Showvember's poor track record in this blog so far

Popcorn takes Speed

And now finally, Durability...yeah, uh, App takes this easily, scales to Frosting, who got kicked to the Sun by Gamesphere, and the [Bed-moon feat](#) by Kazoo & Cactus doesn't even effect durability since no one was hurt, at most, Showvember's best seems to be getting launched into the distance with no problem, which isn't really comparable, but now that I think about it, maybe it is??

Ok, after further review of the feats, I've decided to tie them in Durability

Arsenal

Alrighty, Arsenal, lets compare em, we'll look at them individually

Up first is App, their stuff is...actually useful, things like the Fling Thingy & Chainsaw are pretty good wincons, add that up with things like the Hydraulic Press, Bomb, & Giant Hammer, and we've got a pretty good arsenal

As for Popcorn...eh, there's still good stuff, like the Fist Thingy, Woodchipper, Laser Thingy, & Plank of Loser Dumb (would also mention Infectious Diseases, but those aren't shown to do anything)

Thankfully, there is 1 very big thing in here that lets Popcorn have somewhat of an advantage, the recovery machine behind that door! It's extremely useful in this situation since it basically gives Popcorn infinite tries

But other than that, Popcorn's Arsenal is REALLY lacking when compared to App's

Hmmmm... this is a tough one, ill think about it... ok after like 10 minutes, I've decided to give this to App, yes, Popcorn has a pretty good Arsenal, but it's nothing App can't counter with literally everything else, and Popcorn isnt as bs as what App can throw out

Abilities

Ok now this is an absolute wash in Popcorns favor, App's abilities are much more meant for hosting, with the only real useful ones being Shapeshifting, Teleportation, & the Dimension shenanigans

Meanwhile, Popcorn is not only basically Immortal, but also has **4 SEPARATE INSTA WINS**

Popcorn easily takes this

Outside Help

And we are ending with a stinky one...App easily takes this one, way better outside Help compared to Popcorn

Golden Jimmy has 2 ways of insta winning, there is straight up a clone of App, Publahs have eaten & disabled Contestants, & Silver Alvin & Crayon give moral support

Meanwhile, the Dads don't do shit, & Nutty is a very useful but very easy target, the only really useful ones are The Guards & Popcorn Jr, but those are basically just regular people

App takes this easily

Final Verdict

Okey doke, we did the thing, which means...

The Winner is App!

Next Time: no more next times, especially after the first one (ChuckFlower still haunts me whenever I open the Docs app)

Apps original Background

Background

App

Apps da host for BFPOR...ok lemme talk

Basically, Woopdoo (BFPOR's creator) is apart of the OSC, and back in 2018 (or somewhere around that time), she wanted to make an Object show, something that was comedic & very goofy, so she made BFPOR, which she decided to use App as the host (App was supposed to be used in another show, but whatevah)

Anywho, during the 2010's, BFPOR got 2 episodes, ep1's challenge was to save Frosting, which they did, then, ep2's challenge was to save Chronic (App's sonic burger boyfriend thing), which...didnt go so well, you see, BFPOR 2 was actually split into 2 parts, 2a & 2b, but 2b never happened, so no one saved Chronic

Then...fast forward 6 years, App went missing after 2a & the contestants waited for them, they decided to do a manhunt for more fellas, but then they just...showed up, altered their artstyle to match the others artstyle, & put them all up for elimination!

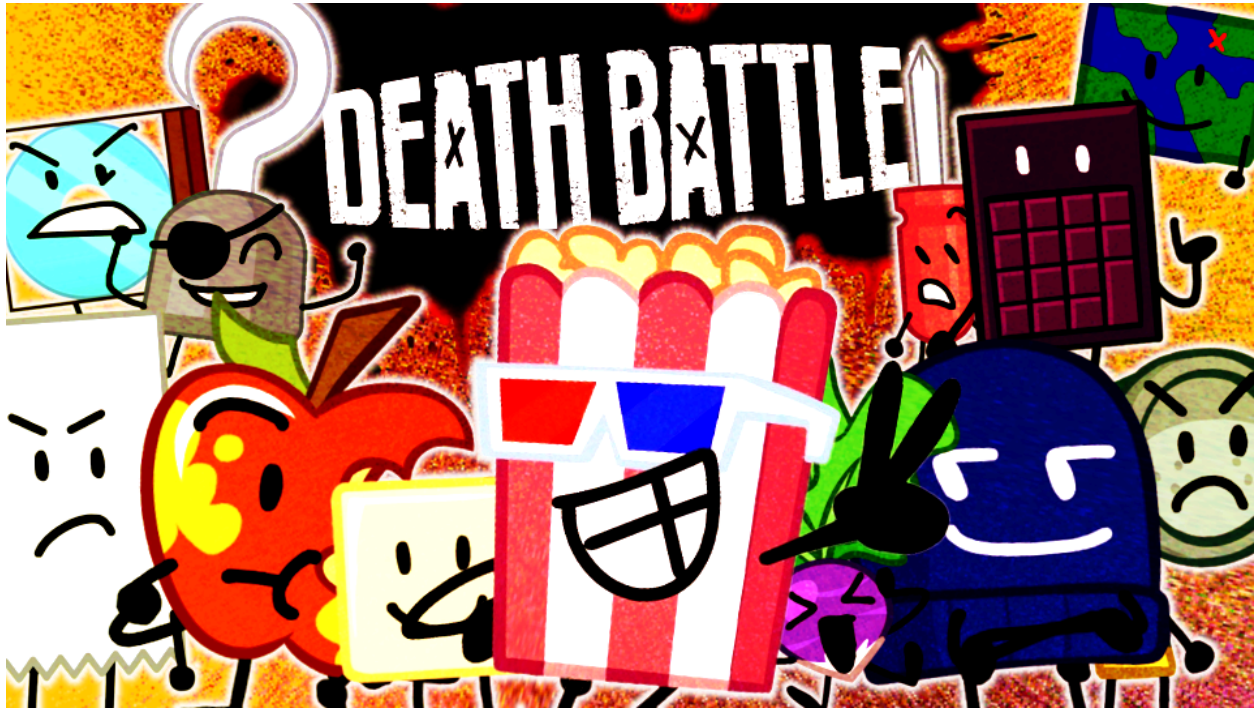

Then, ep4's challenge was a Gameshow that App hosted, ep5's challenge was to care for a Publah! And ep6's challenge was to get back Klumpus & get App a boyfriend to replace Chronic!

Unfortunately, Klumpus died cause of Pingu Bible, so no one replaced Timothy Toy (who died early in ep6), and no one replaced Chronic, but Gamesphere & McNugget brought back Chronic! Who...quickly rejected App, so no one wins! Silver Alvin wanted App to not put everyone UFE, but since its App, they just put Silver Alvin UFE

And thats where we're at rn, this won't be updated after BFPOR 6 unless BFPOR 7+ happens this month

Cut This cause it was dookie compared to new one (to me atleast)

Og BG arts

Popcorn initially had Cloning as an ability (cause ep6) but I removed since there's literally no evidence backing it up besides the voting screen

Contestant Clones (Debatable)

At the end of s1 ep6, the thing to vote on was to clone a contestant! While it...never happened, it's still worth noting

Cloning (dubious)

The things viewers get to 'vote' to happen at the end of ep6 is to clone a contestant, something to note is that this never actually happens, none of the things viewers can vote for happen, literally every episode was worked on at the same time

(From Abilities)
