I apologize for the lack of organization here, I am not that well versed in Google Docs

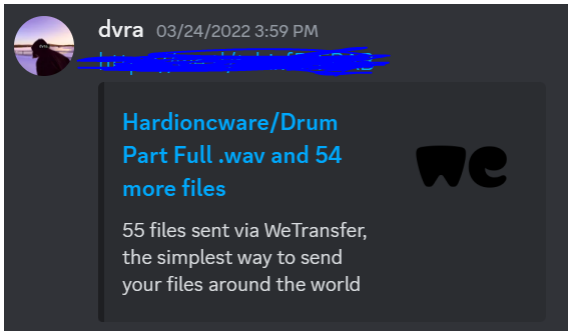

1.) Sixtysevenriddim (https://soundcloud.com/sixtysevenriddim) referring to when he leaked the spazzout stems on r/xTrill, which ended up being mistaken for my doing

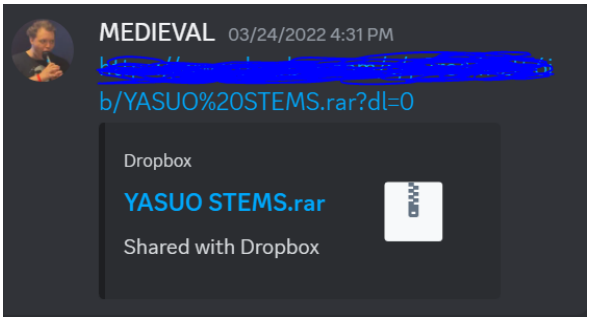

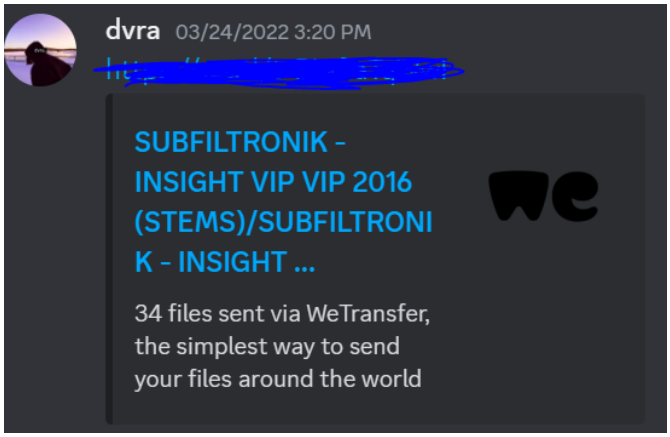

2.) CrySomeMore’s callout post in the Riddim Dubstep Society

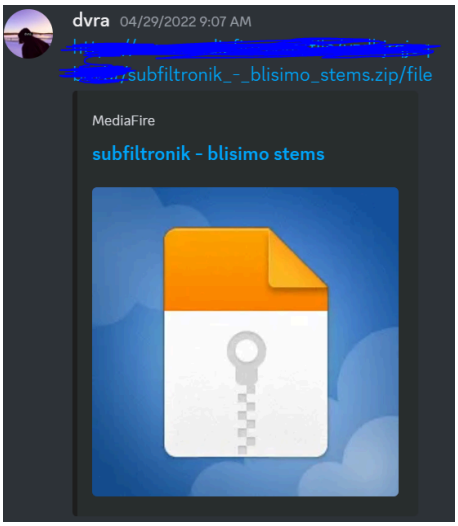

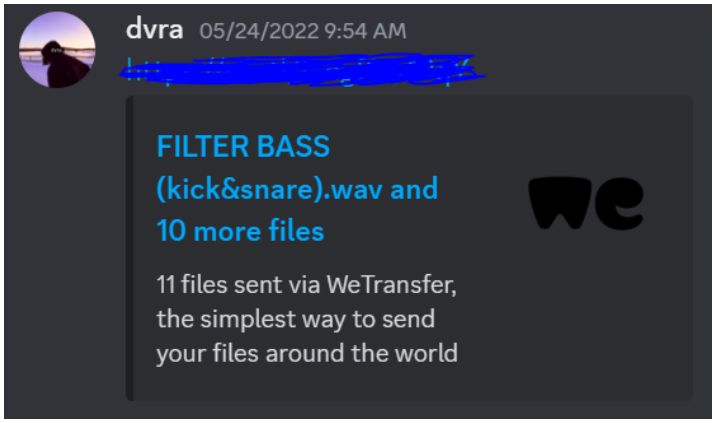

3.) Stems being traded with me from when we thought it was okay to do so.

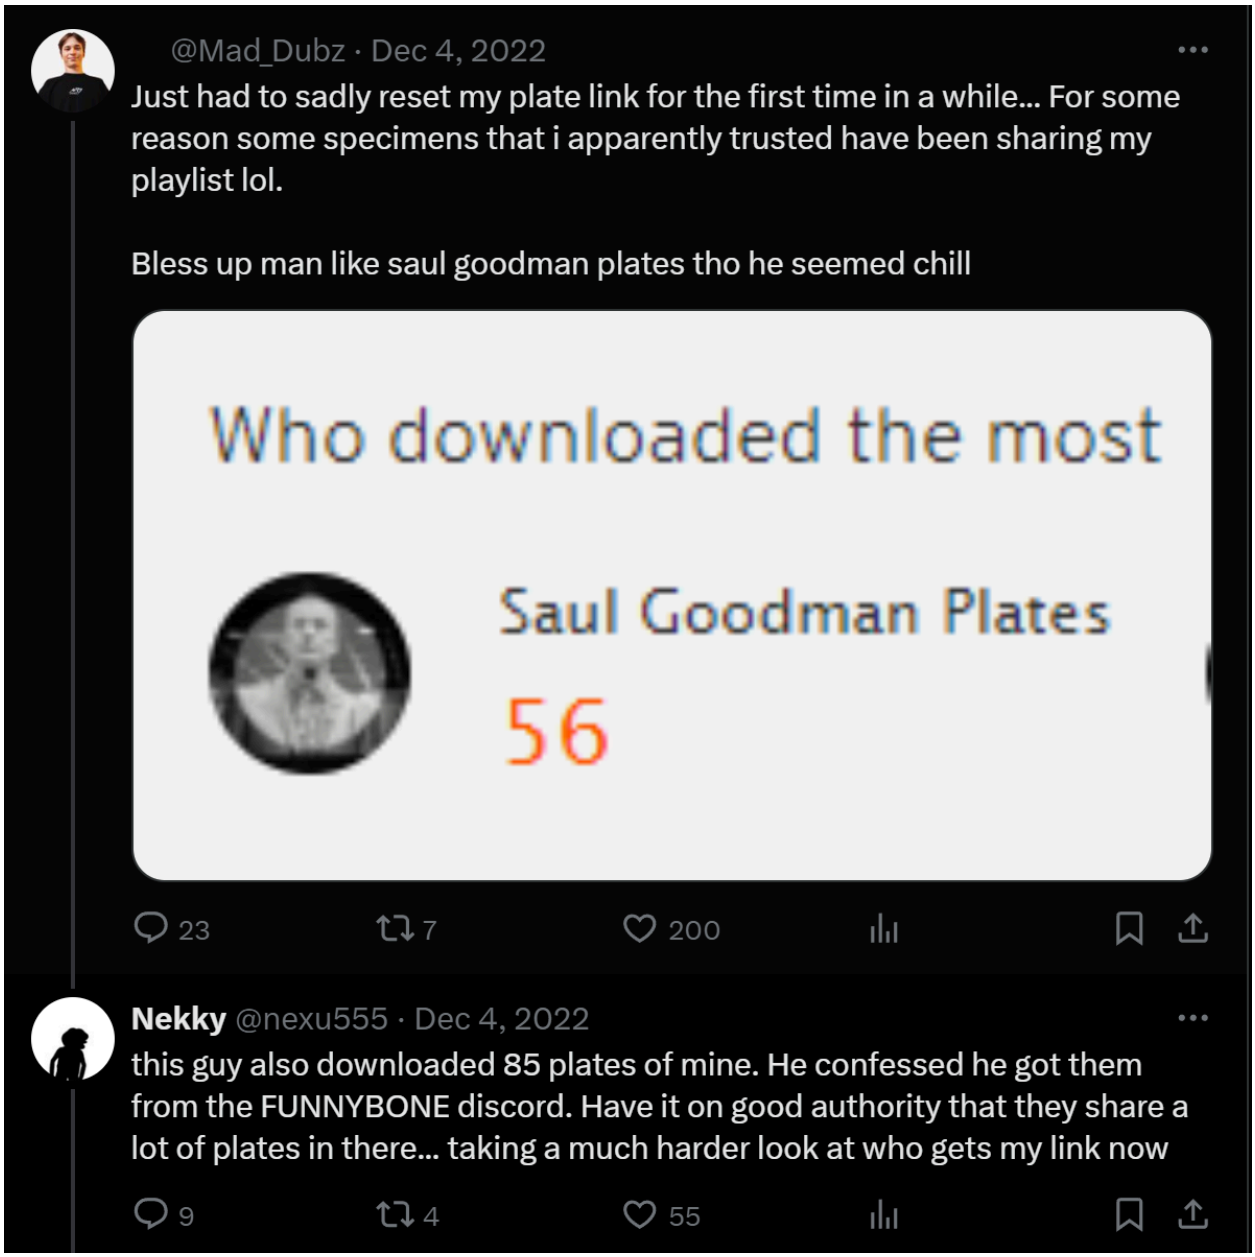

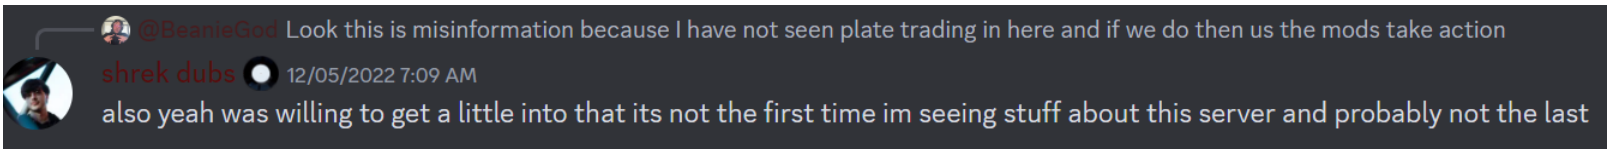

4.) Mad Dubz and Nexu5 thinking that their unreleased were leaked in the FB discord
https://x.com/Mad_Dubz/status/1599478065759154176

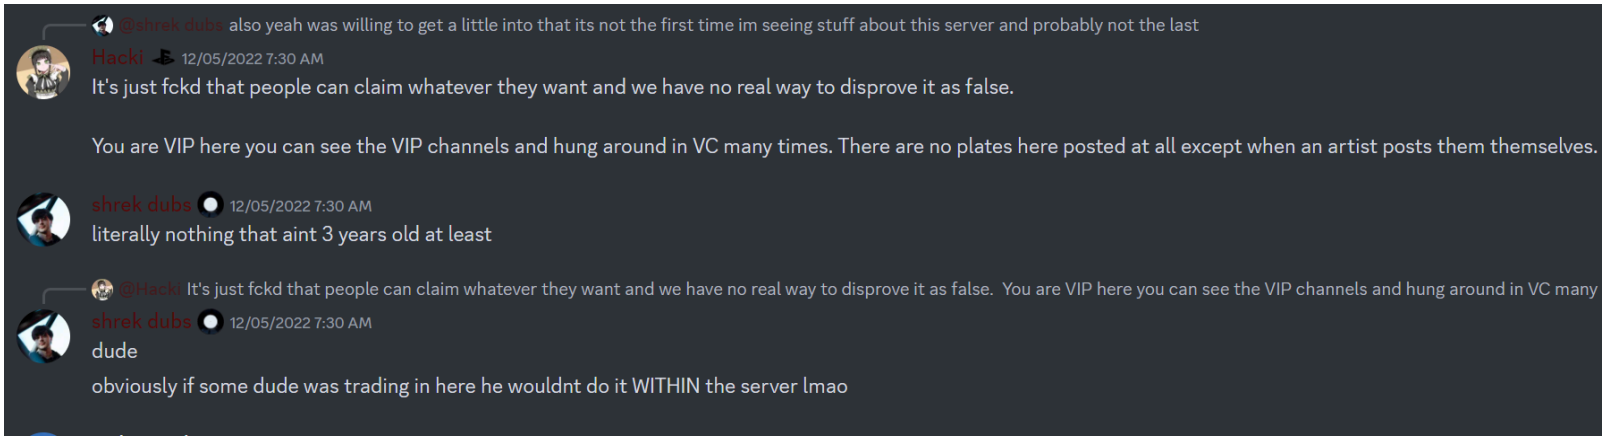

5.) Shrq and others vouching for Funnybone, not leaking tunes
