

Splat Tank!

See below for a list of suggested resources for helping students create their Splat Tank! pitches and marketing materials (optional for grades K-5, required 6-8). Most of these resources are available to students through Google or Microsoft and the additional resources should have free versions available.

Remember, all pitches should include Splats or the Unruly App and should be no longer than four minutes. Students can choose whatever modality they want to film their pitch, such as a screen recording of their game, explaining how it works, or a full video where they are pitching and playing or explaining their game. Let their creativity flow!
