

Useful ways to stay away from Internet Crime

In recent years, the Internet has become a part of our daily life. We can communicate with others, collect information and do shopping through the Internet. The Internet is very useful. However, we have to be careful and avoid falling into traps when using it. In view of this, I would like to give several suggestions to everyone on how to stay safe from Internet crime.

First, regarding online shopping, we need to check the credibility of online shops. Some shops collect the personal information of customers and misuse it. Therefore, we have to be careful when doing online shopping. Otherwise, the details of our credit cards and other personal information may be disclosed without our permission.

Second, we need to be careful when we download files from the Internet. We must not download files from unknown sources. Also, we must not download copyrighted materials since it is illegal.

Third, we should use instant messaging to chat with family and friends only. If you want to make new friends using instant messaging apps, then you should verify their true identity, as some of them may have bad intentions.

Fourth, and finally, you need to be careful who you chat with in online chatrooms, because their real intention may be to collect your personal information when chatting with you. It is important for you to protect yourself on these platforms.
