**ClassMessenger** App or web based Free on App Store

[Class Messenger | Teachers, parents and students in sync.](#)

Class Messenger makes it effortless for teachers to send home important notes and updates about the day's learning experiences. They can even see exactly which parents have read each note. And whether via app, text or email, communication through Class Messenger is always private.

**Quizlet** App or web based Free on App Store

[www.quizlet.com](http://www.quizlet.com)

Create flashcards based on any vocabulary that you use in the classroom. Quizlet's flashcards, tests, and study games make learning fun and engaging for students of all ages.

**Socrative** App or web based Free on App Store

[Socrative](#)

Socrative lets teachers engage and assess their students with educational activities on tablets, laptops and smartphones. Through the use of real time questioning, instant result aggregation and visualization, teachers can gauge the whole class' current level of understanding. Socrative saves teachers time so the class can further collaborate, discuss, extend and grow as a community of learners.

**Educreations**    App or web based    Free on App Store  
Expensive for the upgrade \$99

[Educreations](#)

Record your voice and iPad screen to create dynamic video lessons that students and colleagues can access any time.

**Nearpod**    App or web based    Free on App Store

[Nearpod: Create, Engage, Assess through Mobile Devices ...](#)

Nearpod is an app that allows teachers to share content on all of their students iPads simultaneously. Teachers can embed review questions, videos, and other multimedia aspects. Teachers maintain complete control over what is viewed. Students cannot move on until the teacher is ready.

**Book Creator** App only Free version or \$4.99 for upgraded version  
(highly recommend) on App Store

This app allows students to create their own books on the iPad. Books can then be uploaded into iBooks.

**Explain Everything** App only \$2.99 on App Store

[Explain Everything™](#)

Explain Everything is a unique interactive screencasting whiteboard app that allows students and teachers to create interactive video lessons and record their voice presenting on any topic.

**Kahoot** Web based (can create an app for the iPad though) Free

[Kahoot! | Game-based digital learning platform](#) Teacher Account

[Kahoot!](#) Student Account

A game based program that allows teachers to assess student understanding on any material that is taught in the classroom. This is a very fun and interactive platform. Kahoot was the most requested thing we did in my first year of 1 to 1.

**Green Screen** by Do Ink App only \$2.99 on App Store

This app allows students to create video projects in front of a green screen. Any background can be added into the video. Great for newscasts or presentation of material. Also can be purchased as a bundle with an animation program for \$5.99 on the App Store. The animation bundle allows students to create animations that can be included in their video projects.

**Edpuzzle** App or web based Free on App Store

[EDpuzzle](#)

Edpuzzle allows you to take certain videos (YouTube now works) and embed questions directly into the video. Students can rewatch certain parts of the video to be able to go back and answer questions.

**i-nigma** App only Free on App Store

A very good QR code reader.

**QR Code Maker** Web based only

<https://www.the-qrcode-generator.com/>

A great website to create QR codes for your classroom.
