Friendship Stoplight Game

The object of this game is to decide which scenarios are most compatible with each of the following three statements: “these are bad signs in a friendship”, “these are warning signs in a friendship” and “these are good signs in a friendship”. Attach the appropriate answers to the board/wall beside the corresponding stoplight with tape or magnets. There are several ways that you can play this game. You can read the scenarios aloud and ask students where they think they best belong. You can give scenarios out to groups of students and they can arrive at a consensus. You can place the scenarios on overheads or on the document arm and ask volunteers to give suggestions. You might also consider placing the scenarios around the room and asking for volunteers to place them beside the proper stoplight on the board. No matter what pedagogical strategy you use to play this game, be sure that you ask students for explanations regarding their choices. The most important part of this activity is the discussion around whether each scenario constitutes a good, a warning or a bad sign in a friendship. It is in this arena that students will be able to discuss their various points of view. Your role in this game is to facilitate and mediate the conversations of your students. When there is disagreement, you might choose not to place the scenario beside one statement, but rather choose to set it aside for further debate and discussion. If the scenario clearly represents a bad or warning sign, be sure to make this clear for your students.

There are fifteen scenario cards. Five scenarios correspond with each coloured stoplight: red (unhealthy/bad signs), yellow (warning signs) and green (healthy/good signs). While there may be some discrepancies, the following is a list of suggested correct answers.
