

SCP-1048-G

Throughout the duration of multiple interviews, I obtained a number of information about the relationship between SCP-1048-G and SCP-2295

knowing that SCP-1048-G is made out of the remnant of SCP-2295 killed by a turret in Site Alpha bellow are the conclusion I made and confirmed :

First of all, first of all it seems that SCP-1048-G is fully aware of the existence of Site Alpha and it's activity, as well as SCP-2295 however, even though SCP-1048 seems to have talked about SCP-2295, SCP-1048-G still has little knowledge of him.

SCP-2295 influence SCP-1048-G medical capacities and psychology, and the will of SCP-2295 to heal and help lives through SCP-1048-G.

It is implied that SCP-1048-G was not made aware of his link and connection with SCP-2295 but is still influenced by him.

Furthermore, it was confirmed in an interview by my Research Specialist **Pax_ed** that SCP-1048-G is indeed made from SCP-2295.

 INTERVIEW || Maxaot - 1048-G - 007 - 13/04/2024

SCP-1048-A

It has been stated at multiple occasions that SCP-610 and SCP-1048 are friends, and in a specialized addendum made for this occasion.

Furthermore, Lore Records show and demonstrate how SCP-1048 killed instances of SCP-610-2 to make this instance.

The link between those anomaly are more evident by the appearance of SCP-1048-A

SCP-1048-D

SCP-1048-D teleportation and colors scheme are directly derived from the Void Guardian one, and take the same appearance as the void guardian portals.

Furthermore, the Void Guardian have tried to kill this creature on multiple occasions, ever since the attack of the main bear on those to create Void.

SCP-1048-I

This anomaly features the giant eye of an eyepod in his stomach, making the reference and appearance obvious.

Furthermore : This anomaly has been noted to act and behave a lot if not a 1:1 copy to SCP-131 as shown in the linked log.
