AMER GOVT BMARK 1:

"Don't Hate the Playa, Just Change The Game"

AmerGovBMark1Contract

CONTRACT

HOW YOU PLAN TO WORK?

- Solooo

WHO YOU ARE WORKING WITH?

- Me, Myself, & I.

WHAT IS "UMBRELLA" ISSUE YOU WILL CREATE A LOBBY FOR?

- Environmental Protection

WHAT IS THE SPECIFIC SUB-ISSUE YOU WILL FOCUS ON?

- The Effects of trying to maintain the levels of global climate change/warming with co2 levels.. etc.

- I am very large on maintaining a healthy ozone and environment for the Earth, and as of recently there have been many articles preaching about how the world has decided on specific numbers of Co2 that cannot be reached, and we have thus far exceeded more than we should have. & it's an on going mission of knowing that after a certain point of sooooooo much global climate change, it could drastically cause a ripple effect of the maintenance and beauty of the polar ice caps, fresh water systems, land flooded with water, islands gone.. it's almost as if the world is ending.

I feel this issue is more than just materials and money. It is the reality of our planet. There is more than just the insane problems that we have politically and socially created, but this environmental and drastic for our actual nature. I view it as, we created money issues and dramatic things with news. But this.. this is actual reality. This is live or die. This is no joke.

WHERE YOU WILL LOBBY?

- THIS IS A WORLD ISSUE!!!! Mainly US and China.

WHICH ORGANIZATIONS YOU WORK WITH?

- Green Party of the United States of America

(Brief description of who they are, what they stand for, link to their website)

- <http://www.gp.org/index.php>

It's a political party who believes in the recreation and beauty of our countries, as well as the well being to.. be.. "green." Dealing with water, soil, air, and energy.

WHO “REPRESENTS” YOU?

- John Eder, in 2002 he was the first state elected green legislature.

[<http://gp.org/greenpages/content/volume8/issue4/article3.php>]

His run didn't last long.. before it even began a lot of bad things happened that stopped him from continuing. He received 67% of the vote in portlands west.

(Brief description of who they are, how long in office, pol party, link to website)

HOW WILL YOU PRESENT YOUR WORK?

-Choose one of the following or propose an alternative method:

- Comprehensive multi-media Blog

Web. 04 Nov. 2012. <http://gp.org/greenpages/content/volume8/issue4/article3.php>.</p> <p>- information on green guy for green party</p>

2. "ASK"

-a succinct sentence for your Lobby

(What are you going to "ask" your decision maker to do?)

(for ex. Federal dollars should support non-abortive Planned Parenthood services)

- Enforce Laws Towards Maintaining Earth's Average Temperature

(Give 3 rules)

- 1.Help let it be publicly known via government
2. Honestly consider hemp...
3. Enforce Carbon regulations

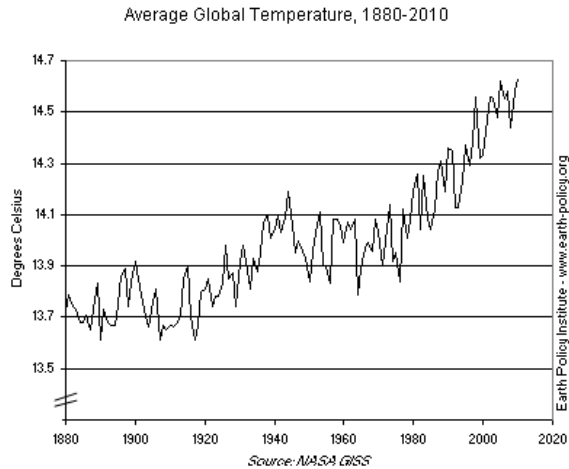

Question:

3. EVIDENCE

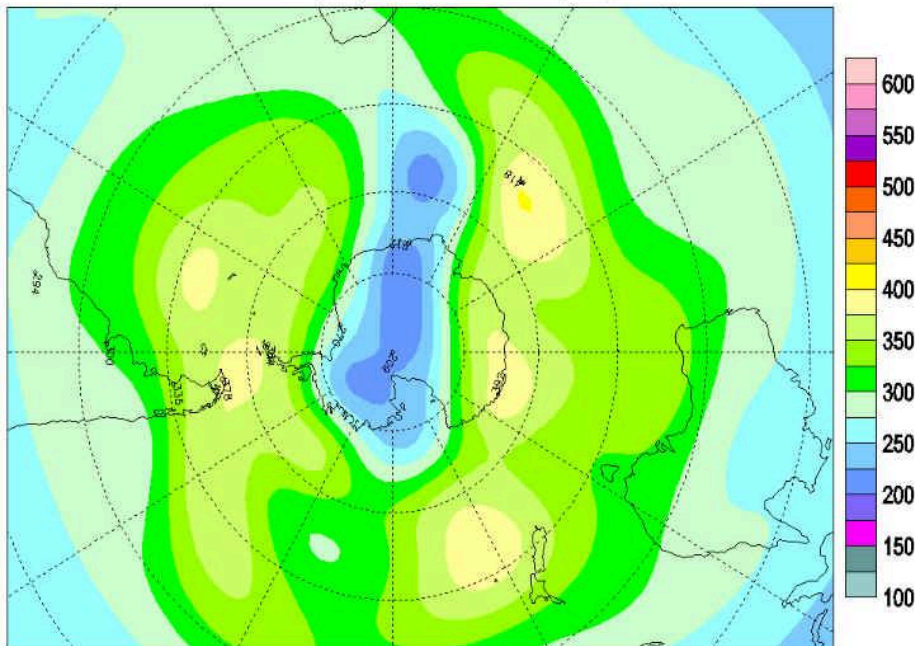

-evidence of the history you will include in final petition

(video clips, prezi, dippity, screenshots, data vis, podcasts, script for narration)

- I don't understand this? Mine was mainly sources, graphs, and pictures.

Total ozone (DU) / Ozone total (UD), 2012/11/05

YOUR RESOURCES SHOULD HELP ANSWER THE FOLLOWING QUESTIONS

(if they don't you need to find new ones)

1. Why should we care about this issue?

(convince us that this is a critical issue to spend time/money on)

- We should care about this issue because this is not one of those issues that involve an actual fix with multiple options, and time. This issue is something that could give an unfixable solution and ending. It's not money problems, or government problems. Those can take time and

thought. This is a rush that could forever damage or effect the way society lives. If we even live through it. Energy is what runs the world, and Co2 is what could stop the world

2. Why did other groups/individuals start caring about this issue?

(what major moment(s) led others to get involved?)

- They started caring because they saw the weather wasn't the same, and that bad things can happen when soooo much of a certain gas (man given in this case) does to the world. How, the ice caps are melting and how the water levels are higher. How the heat is stronger and worse than before. How every year it's only getting more and more. What is happening.. and finally finding out.. It could really lead to a different future.

3. Are there any high-profile individuals in support of your issue?

(who are they, which groups do they represent, why are they involved?)

- There are small non profit, but none of high standards. People don't truly care too much. It doesn't look like much of a "threa"

4. How far back can you trace this particular movement for change?

(try and define the moments that gave birth to the modern movement)

- Not toooo far, the earliest sign could be the around the mini ice age with the civil war. but that's only comparing the similar weather style, not the same reasons. Maybe the last 100 or so years.

5. What major events have occurred in the life of your issue?

(include at least five definitive "flash points" in the history of your issue)

- Melting ice caps, ozone destruction, finding a cap point to c02.

6. What are the other perspectives regarding your issue?

(know your opponents "facts/figures" to ensure you can defend your side)

- People say it's not that big a deal, and all that will happen is weather changing. but what's so wrong with a change in weather? They also feel it's something that can wait.

7. What Laws/Supreme Court decisions have been passed regarding your issue?

(become VERY familiar with them- for ex. Roe v Wade made Abortion legal)

- That there is only 2-3% allowed left on Co2 and that's all together. That's not even yearly. ANd we've already gotten passed 1.8% in 2-4 years.

8. What impact have these legal developments had on your issue?

(be specific about the social, economic and political impacts)

- They do not make other calm on the issue, they just make it more scary because stopping it is hard. It's a lot harder and take more dedication than a few proposed ideas.

9. What specific communities/groups have been affected by this issue?

(regional, ethnic, socio-economic- for ex. Arizona SB1070 law affects Latino community)

- The green party play a huge part because they feel and understand what a green house gas effect and global climate change can due to the world.

10. What do you want your Representative to actually do or change?

(You need to pitch something specific- for ex. outlaw smoking in restaurants)

- I want them to actually help put forth that it isn't something small to be said, but there needs to be more of a serious understand to how much this needs to get out. For example.. if possible, with given information and drastic care.. it's possible to make a few (3) idea rules for states and cities to follow to help all over. Maybe even help encourage china!

:)

1

Good Afternoon Mr. Stack, my name is Cecelia Baez and I am a student as Science Leadership Academy. A special admission high school partnered with The Franklin Institute, and located in Philadelphia, PA. I email you today to discuss my insane interest in our community and the environment around us. Not with people, but with nature. I have a strong passion for global climate change and the drastic measures our planet may face. I've been dedicated to working as an environmentalist and engineer with energy since I was in 7th grade. I am currently a senior, and working on a project that requires individuals to petition causes in our country, or even our world, and push them to potentially become state or federal laws. I've taken the chance in emailing you to ask if you would support not only my petition, but glance over my website, maybe give a few pointers to what i could change to make it more effective. &If none of those ideas interest you, then I appreciate you even taking time to read my long rant, as well as if you ever need any young brains in the field . I'm always happy to oblique. It's my dream, and I will get there one day. Thank you & have a wonderful rest of your day (:

His response:

Re: :)

Inbox - Gmail

Thank you for contacting me. I appreciate receiving your email. Due to large amount of emails I receive, I will respond to your email as quickly as possible. If you require immediate assistance, please call one of my district offices:

- Academy Road Office in Parkwood, 215-281-2539;
- Bustleton Avenue Office in Rhawnhurst, 215-695-1020.

If you have sent me an invitation, please resend the email to ngraveley@pasenate.com

If you need assistance with a notary renewal or citation please resend your email to cschill@pasenate.com

Again thank you for contacting me. I appreciate having the opportunity to serve you.

Sincerely,

Senator Mike Stack
