My preferences (I constantly use)

Ubuntu, mc, libreoffice, MySQL, GitLab, Nginx, rsync.

About myself

Hobby - AVR based prototyping, dota1, anime, 3d print, 3d modelling, unicycle (ninebot e+), DevOPS.
I not like PostgreSQL – problems with replication, problems with backup/restore indexes and too hard access rules for users.

I not like RedisDB – mysql db in ram is more usable for my own opinion.

I Love JQuery, always use Twitter-bootstrap for styling.
