

Dear Dad,

It is because of the immense happiness that you had actually shared with me, my mom, and the rest of the other siblings, all alive today. I am simply obliged to you for raising me with care, love, and also encouragement. I find myself lucky to have a wonderful dad like you. Even though you have departed from this world over [mention the years] years ago, it actually seems to me that it happened yesterday.

I will not forget the moment when I saw you for the last time before being taken to the operation theatre for open-heart surgery. My mother and my younger sister were inconsolable. But my elder brother kept quiet. But I could understand the inner battle that he was going through. We were sitting with our fingers crossed for the whole night and the next moment doctor shared the news of your departure from this world.

Dad, you were actually the source of happiness in every moment of life. We remember how you had surprised us during any occasion in our house with beautiful gifts, be it Birthday, Christmas or Easter.

You had always given us the best things in life. Dad, I remember how you had taken all of us trekking in the hilly areas during the hard financial days. We really enjoyed those moments. It was a real adventure for us and we did learn lot of things by coming close to nature. In fact, you had inspired us to love and protect nature.

Dad, I will be always grateful for all those beautiful moments.

Thanking You and Missing You,

From Your loving Daughter,

[Mention your name]
