

Justin Stowe | Full-Stack Web Developer

[My Portfolio Page](#) | 801-759-1809 | justinstowe12@gmail.com | [in/JustinStowe](#) | [github.com/JustinStowe](#)

Skills

Software: JavaScript, React.js, Typescript, python, nextJS, Vite, HTML5, Tailwind, Postman, Express, Node.js, MongoDB, Mongoose, Git, GitHub

RELEVANT WORK:

Solo Project: Photography business page

Solo Software Engineer | 3 weeks [Github](#)

- Goal of Application: To simplify a photographer's life and help them run their business more effectively.
- Built a user-friendly interface with React and TailWind, utilizing MongoDB, express, Zustand, and Cloudinary to deliver a seamless experience for clients and photographers.
- Composed of a public portfolio page, authentication using jwt token, Calendly link to make appointments, photo edit and review, and online storage features to provide a comprehensive solution for photographers.

Group Project: My Movie Tracker

Lead Developer | 3 weeks [Github](#)

- This app is designed for movie enthusiasts. Allowing them to organize their movie watching activities in one place. Users can keep track of movies they intend to watch, movies they have already seen, befriend fellow movie enthusiasts and add personal comments on each film as well.
- App made with React, Express, MongoDB, and Sass
- Utilizes Imdb API and React Context Controller useHook.

Solo Project: Lemons

Solo Software Engineer | 2 weeks [Github](#)

- Recreated classic game "Lemonade Tycoon" from scratch using HTML5, CSS, JavaScript and VS code.
- Utilized the game as a teaching tool for children to learn about economics and resource management.
- Built a functional and playable game, with a customizable interface for future learning and growth.

WORK EXPERIENCE

Full Stack Developer - Justin recommendations

Salt Lake City

2022-2023

- Develop web applications using latest React features and tools
- Utilize Node.js and Express for back-end functions and API endpoints
- Actively participate in all phases of the Software development lifecycle
- Completely document projects, including detailed descriptions of all project functionalities.
- Work with multiple deployment applications including Heroku, Digital Ocean, and Netlify
- Implement AWS serverless functionality on multiple applications.
- Use MongoDB and PostgreSQL for data management.
- Implement client-side interfaces using NextJS and React.js
- Utilize IDEs such as VS studio code.

Truck Driver- Multiple Companies

Salt Lake City

2017-2022

- Efficiently trained new truck drivers on navigation and route planning software, improving the average efficiency of delivery operations by 15%
