-[Basic Data]-

Date:	8/20/2025
Anomalies:	[SCP-049, SCP-268]
Highest Containment Zone:	Moderate Containment Zone ▾
Research Question:	The Doctor can sense the Pestilence from very far, knowing almost its exact location. Can The Doctor know where someone infected with the Pestilence is while using the SCP-268?

Test Subjects	Combative Personnel	Other Personnel

-[Procedural Statement]-

STATEMENT:

"I **Agree** that I have followed all testing procedures and regulations throughout the duration of this test. I also understand that if a breach of procedure/regulation were to occur during this test that I may and will be punished."

I, **Required** permission to complete this test. If you required permission, please place an image of the written approval below.

Permission to take 049 to CDC.

**@elijahdude00** so you want to do a SCP 049 x SCP 1048-G cross-test where patches uses ...

**joaodjsidgkj**   26/06/2025 21:13

To cure a infected CD

I m talking about using Doctor's cured

not*

I m not

He would refuse saying they are already cured btw

I want 049 to be escorted to CDC, pick a CD with the pestilence then come back to its lab and see if the SCP1048-G overcharge ability will cure the CD from the patient. Thats it. **@elijahdude00**

**elijahdude00**  26/06/2025 21:15

ah

Alright, approved

-[Method]-

Pre-testing methods:

Before the test starts I will explain to my escorter what I want him to do:
-Firstly, I will request in the "#requests" channels for him to bring the box containing SCP-268.
-Second, when he is with me I will ask him to escort me and SCP-049 to CDC to get a subject infected with the Pestilence.
////////////////////////////////////

During testing:

-The Class-D would be ordered to put on the hat and wait for the effects to fully kick in.
-The Class-D would hide around MCZ(outside any CC) and the Doctors would have to find him.
////////////////////////////////////

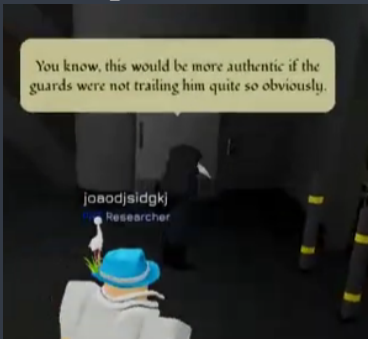

All of the following methods were written after the test was conducted.

Pre-testing methods: (Footage part 1-2)

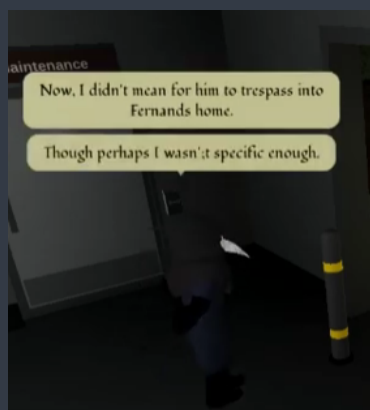

-I drove to site Epsilon and said on the "Requests" channel "Requesting 1 **SU** and SCP-268 to Site-Epsilon".
-Shortly after it got copied by a **MP** and he brought me SCP-268.
-When we got to the Doctor's Lab I was briefed and then we waited for protocol **Uproar** to end (it started in the middle of the briefing).
-We went to Site-Omicron right after protocol **Blue Skies** was activated.
-When we go to Site-Omicron we heard the Daleks but proceeded anyway since the Doctor didn't care.
-Right after that we got stopped by a group of Daleks and asked to identify ourselves. The Doctor said he is a Researcher and I almost got blasted even after saying that I am "Researcher joadjsidgkj".
-Then I got caught in the cross fire of a Dalek and almost died, I only survived because the Doctor healed me.
-Even with all that trouble we managed to get 1 Class-D.
-We drove to the Doctor's Lab where the Class-D got briefed and the test could begin.
////////////////////////////////////

During testing: (Footage part3-4)

-We soon got into the external part of SCP-049's chamber and ordered the Class-D to put the hat on.
-Shortly after the effects kicked in .
-Then we headed outside and the Doctor asked the subject to run down the MCZ road towards the SCP-1048 chamber and further. Also said for the subject NOT to enter any chamber.
-The Doctor started following the invisible subject even without any signs that the subject started moving.
-Eventually we caught up to him and the Doctor told him to hide again, but this time between SCP-082 and SCP-173 's chambers.
-The Doctor proceeded to state that "This would be more authentic if the guards were not trailing him quite so obviously".

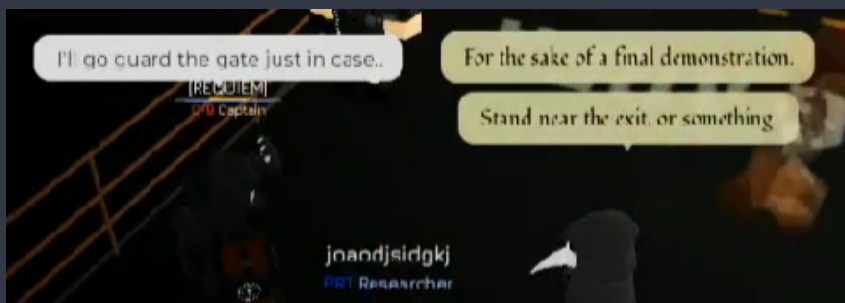

-We were at SCP-082's chamber entrance and the Doctor was aware that the subject had trespassed into "Fernad's home".

-The Doctor went into the backroom and went straight to the subject's location in the garden.

NOTE: Keep in mind that the Doctor didn't go directly to the CD's location and instead followed a longer path. This was the first thing that made me think if the Doctor could sense a trail, like a dog follows a trail using its keen sense of smell. Even though I now see that the Doctor probably did it in order to not wake up Fernand since that door is locked by a key card.

-To try and make this harder the Doctor ordered the guards to stay with us and only guard the gate that led out of MCZ.

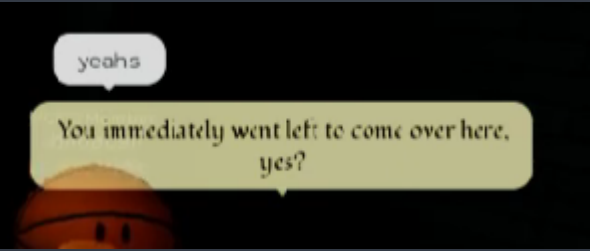

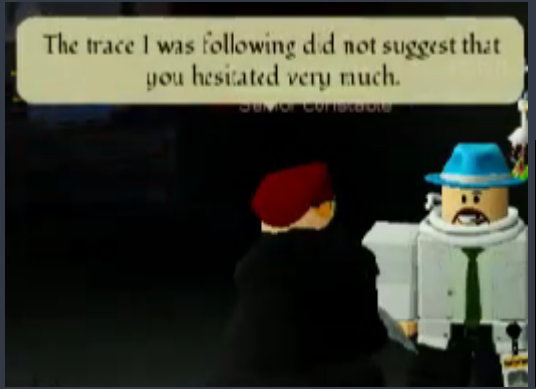

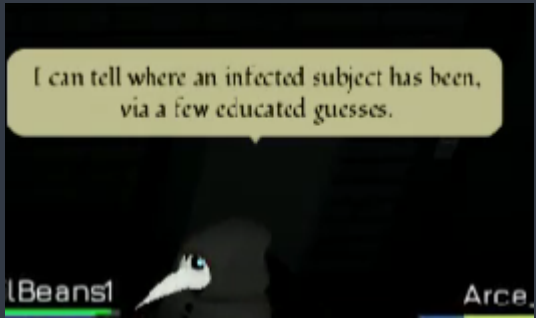

-The subject went to hide and the Doctor, after 10 seconds, went to seek him.

-Not long after the Doctor found him.

-The Doctor then asked me if I wanted to do a final one and I said it was up to him. **NOTE:** I am so thankful we did this last one because it confirmed my suspicions about the Doctor sensing the Pestilence some other way.

-We followed the Doctors and at 0:13 (Part4) he said "Never went this way it seems."

-1:18 I stated that what the Doctor said caught my attention and asked "You follow traces?" and he replied "Yes."

-I recommend watching the dialogue within the time stamp 4:15-12:20 (Part4). I know it is 8 minutes but it's very rich in information.
////////////////////////////////////

Pos-testing: (Extra Footage)

The extra footage is not necessary to fully understand how SCP-049 tracks the Pestilence's sense, but the Doctor explains it further and makes it easier to understand.

-During our final conversation I asked him if this tracking method was ever discussed with other researchers because I had never heard about it. 2:05-2:40.

-The Doctor confirmed to know multiple methods, further explained his tracking methods and offered to show me how he does it in action.

////////////////////////////////////
