

Winthrop Middle School
Student Learning Opportunities & Resources
Core Subjects
Week of 4/6/20

The student learning opportunities and resources listed below are not intended to replicate your child's school day or learning experiences. They are however useful to support learning, promote academic engagement, and assist in skills maintenance during the disruption to school-based learning. By taking advantage of these opportunities, it will help minimize the disruption in learning. **Based on the recent information provided by the MA Department of Elementary & Secondary Education, students are expected to engage in these opportunities - they are NOT voluntary. If any student is unable to engage in their learning opportunities, please contact Mr. Curley at bcurley@winthrop.k12.ma.us. There will be more information within the next week regarding an update in our Remote Learning Play.**

It is strongly suggested that students engage in the learning opportunities each day (Monday through Friday) in their core subjects as well as choosing two specials to engage in each day. Please know, these learning opportunities will not be graded.

Subject	Grade/Teacher and Other Resources <i>*Please click on appropriate grade/teacher.</i>
