Petition Advocating for Student Safety and Experience for Georgetown Day 2025

We invite all students, clubs, organizations, alumni, faculty, and affiliates to sign below to call on Georgetown University's administration to protect students over their own legal liability and loosen Georgetown Day restrictions that result in less student safety, not more.

In 2024, Georgetown's administration imposed significant restrictions on Georgetown Day. In stark contrast to previous years, they restricted access to residential halls to residents only, limited access to the Alumni Square courtyard and Village A, and required that students and guests have wristbands to enter those spaces. As a result of these restrictions, a significant number of students left campus to celebrate the day.

This meant that fantastic on-campus programming with food, activities, and music saw less students on campus able to enjoy it. Further, the off-campus activities, which drew nearly a thousand students, were not free like on-campus programming. For this reason, activities drawing a significant number of students were not financially accessible to all, fundamentally going against the culture of Georgetown Day.

More alarmingly, while these measures were intended to increase safety, their effects were the opposite. Students who traveled off campus and needed medical attention were unable to access critical services like GERMS, and instead were brought to off-campus rehab centers by DC EMS. This isolated students from both the medical and legal protections offered on campus.

Yet already, even stricter changes for the upcoming Georgetown Day have already been shared with students via some dormitory communications. Access to Village A and the rooftops will again be restricted. Live music/DJs will not be allowed. Additionally, wristbands will be implemented to identify those that are 21+.

This year, GUSA submitted to Georgetown's administration [a comprehensive proposal](#) to address relevant concerns while also protecting student safety and experience. **Last year's failures demonstrate the reality that enacting stricter policies will not prevent students from consuming alcohol. Instead, they will only go off campus, putting them out of reach of critical support services, lessening engagement with on campus activities, and fundamentally changing the culture of what Georgetown Day is and should be.** By enforcing these policies, the university will place its own legal liability over the safety of its students.

We, members of the Georgetown community, call on Georgetown University's administration to reconsider the previous year's policies and enact GUSA's proposal to ensure a safe and fun Georgetown Day for everyone
