

**Week 5: Miracle of Jesus craft. Turning water into wine.**

Supplies provided: paper plate, brad fastener, cardstock to make circle in center.

Directions: Cut the white cardstock to make a circle with a 5" diameter. Color half of the circle purple and the other half a light blue. Poke a hole in the middle of that circle. Turn the paper plate upside down. Decorate the plate to look like a feast or celebration. The small window that is cut out, is a top of a wine glass. Please have your child add the stem and base to that goblet. Attach the plate to the circle using the brass fastener. Write the words, "First Miracle of Jesus" and "He turned water into wine." Have your child tell you the story using his craft. Why do we learn about the miracles of Jesus? This is hard evidence that Jesus is truly God.
