PERSONAL PROJECTS

CodeGenerator - 08/2017

• Based on an idea that helped me when coding, I published a site that generates code from its Models Class. The generated codes are simple CRUD's of your Models, but from them you can assemble your most complex logic. In addition the Site is Open Source so you can adjust it to your needs.

• https://codegeneratorweb.herokuapp.com/

Proto games published - 2016 to 2018

• I designed a few games and publish it some unfinished ideas, together with their codes. Although they are unfinished, they have the basic mechanics established and coded, making it easier to turn into a product.

• https://nivelhard.herokuapp.com/

Mixturados - February 2015 to December 2015

• I worked on the website that organizes League of Legends championships and displays relevant news of the game.
• I worked with asp.net mvc and mysql.
