

Button & Tab Garden Flowers

- **Materials:** Pop tabs (6 per flower), large colourful buttons, strong waterproof outdoor glue, and a wooden dowel or chopstick.
- **How to make:** Arrange the pop tabs in a circle on a flat surface with the top holes overlapping in the center to create "petals."
- **Assembly:** Place a generous amount of glue on the back of the button and press it down firmly in the center over the overlapping holes. Once dry, glue the back of the flower to the wooden dowel to insert directly into potted plants or garden beds. [[1](#), [2](#), [3](#)]
