

Privacy Policy for Bumper Bloom Puzzle

Effective Date: August 13, 2026

Last Updated: August 13, 2026

This Privacy Policy explains how **Bumper Bloom Puzzle** (“Bumper Bloom,” the “App,” “we,” “us,” or “our”) handles information when you download, install, access, or use the App.

Developer / Data Controller: [DEVELOPER OR COMPANY LEGAL NAME — REQUIRED BEFORE PUBLICATION]

Privacy Contact Email: [SUPPORT OR PRIVACY EMAIL ADDRESS — REQUIRED BEFORE PUBLICATION]

Bumper Bloom Puzzle is a casual offline 2D puzzle game in which players rotate bumpers and guide beads into matching bloom cups. The current version is designed for offline play, stores game progress locally, does not require a user account, and has advertising disabled.

1. Scope of This Privacy Policy

This Privacy Policy applies to information handled through Bumper Bloom Puzzle and to information you voluntarily provide when contacting us for support, privacy inquiries, legal requests, or other communications.

It does not govern information independently processed by Google Play, Android, your device manufacturer, mobile carrier, operating-system provider, or other third parties outside our control.

2. Information the App Collects

2.1 Personal Information

Based on the current configuration of Bumper Bloom Puzzle, the App does **not intentionally require or collect** the following through its gameplay:

- Name
- Email address
- Phone number
- Postal address
- User account credentials
- Contacts
- Photos, videos, or other media

- Precise or approximate location
- Financial or payment information
- Health information
- Messages
- Advertising identifiers for advertising purposes
- Biometric information
- Government identification information

Bumper Bloom Puzzle does not require account registration or login.

2.2 Local Gameplay and Preference Data

The App may create and store information locally on your device that is necessary to provide its game functionality, including information such as:

- Current level
- Completed levels
- Game progress
- Scores
- Hint usage
- Gameplay state
- App or game preferences
- Other locally stored progress information

The project materials describe local game progress through the App's existing bridge and storage systems.

This local information is intended to remain on your device and is not intentionally transmitted by us to a remote account or game server as part of normal gameplay.

Because this information is stored locally, we generally cannot remotely access, retrieve, correct, or delete it.

2.3 Information You Voluntarily Provide to Us

If you contact us by email or through another support channel, we may receive information that you voluntarily provide, such as:

- Your email address
- Your name, if included
- The contents of your communication
- Screenshots or attachments you choose to send
- Device or technical information you voluntarily provide while requesting support

We use such information only as reasonably necessary to respond to your request, investigate technical issues, protect the App, comply with legal obligations, or maintain records of significant support or legal communications.

Please do not send sensitive personal information unless it is necessary for your request.

3. Automatic Data Collection

The current Bumper Bloom Puzzle design is intended to operate as an offline game and does not intentionally use gameplay analytics, behavioral advertising, or remote user profiling as part of its core functionality.

The available build materials identify advertising functionality as disabled for the no-ads release. However, operating systems, Google Play, device manufacturers, or other platform services may independently process technical information when you download, install, update, or run an Android application. Their processing is governed by their own terms and privacy policies.

4. Advertising

The current release of Bumper Bloom Puzzle is intended to be a **no-ads version**.

Advertising functionality has been disabled at the App provider level according to the current build configuration.

We therefore do not intentionally use your personal information to:

- Serve personalized advertising;
- Create advertising profiles;
- Track you across unrelated apps for advertising;
- Sell advertising audiences; or
- Share information with advertisers for cross-context behavioral advertising.

If advertising is enabled in a future version, this Privacy Policy and the Google Play Data Safety disclosure will be updated as necessary before or in connection with that change.

5. Analytics and Crash Reporting

No active analytics or crash-reporting service that collects user information is established by the materials currently available for this Privacy Policy.

If a future release activates Firebase Analytics, Google Analytics, Crashlytics, AdMob, another advertising network, crash-reporting service, attribution provider, or similar SDK that collects or transmits user or device data, we will update this Privacy Policy and the Google Play Data Safety declaration as required.

Google Play requires developers to account for data collected or shared through third-party libraries and SDKs and to keep the Data Safety disclosure consistent with the application's actual data practices.

6. How We Use Information

Where we process information, we may use it for the following limited purposes:

App Functionality

Locally stored gameplay information is used to:

- Save your game progress;
- Restore gameplay state;
- Track completed levels;
- Maintain scores and gameplay preferences;
- Provide hints, retries, progression, and related game functionality.

Customer Support

Information voluntarily submitted to us may be used to:

- Respond to support requests;
- Diagnose reported technical problems;
- Reply to privacy inquiries;
- Process requests concerning personal information;
- Communicate about significant issues affecting the App.

Security and Integrity

We may use information voluntarily provided to us when reasonably necessary to:

- Investigate abuse or security incidents;
- Protect our rights and users;
- Prevent fraudulent or unlawful activity;
- Enforce applicable terms or policies.

Legal Compliance

We may process or retain limited information when necessary to:

- Comply with applicable laws;
- Respond to lawful requests from competent authorities;
- Establish, exercise, or defend legal claims;

- Satisfy regulatory or record-keeping obligations.

7. Legal Bases for Processing Under the GDPR

If the General Data Protection Regulation (“GDPR”) or similar European privacy law applies to our processing, we rely on an appropriate legal basis depending on the circumstances.

Such legal bases may include:

- **Performance of a contract:** where processing is necessary to provide a service you requested;
- **Legitimate interests:** such as responding to support requests, maintaining security, preventing abuse, and protecting our legal rights, provided those interests are not overridden by your rights;
- **Consent:** where we specifically request your consent for a particular processing activity; and
- **Legal obligation:** where processing is necessary to comply with applicable law.

Because ordinary Bumper Bloom gameplay is intended to operate locally without a user account or remote gameplay profile, most core gameplay data is not intended to be processed by us on external servers.

8. Sharing and Disclosure of Information

We do not intentionally sell personal information collected through Bumper Bloom Puzzle.

We do not intentionally share personal information with advertising partners for personalized advertising in the current no-ads release.

Information may nevertheless be disclosed in the limited circumstances described below.

Service Providers

If you contact us, communication or hosting providers that we use may process information on our behalf to deliver or store your communication.

Any service provider handling personal information on our behalf should only process such information for legitimate service purposes and subject to applicable contractual and legal protections.

Legal Requirements

We may disclose information where we reasonably believe disclosure is necessary to:

- Comply with applicable law, regulation, court order, subpoena, or lawful governmental request;
- Protect the rights, property, or safety of the developer, users, or others;
- Investigate fraud, security problems, or unlawful activity;
- Enforce legal agreements; or
- Establish, exercise, or defend legal claims.

Business Transfers

If the App or developer's business is involved in a merger, acquisition, restructuring, sale of assets, or similar transaction, relevant information may be transferred where legally permitted.

Any successor would be expected to handle applicable personal information consistently with this Privacy Policy or provide appropriate notice of material changes.

9. Sale or Sharing of Personal Information

We do **not** sell personal information for monetary consideration.

The current version of Bumper Bloom Puzzle also does not intentionally share personal information for cross-context behavioral advertising.

Accordingly, the App does not currently provide a “Do Not Sell or Share My Personal Information” advertising opt-out because the relevant sale or advertising sharing does not occur through the App.

If our practices change, we will provide any legally required opt-out mechanism.

10. Data Retention

Locally Stored Game Data

Gameplay information stored locally on your device may remain there while the App and its associated application data remain on your device.

You can generally remove locally stored application information using the data-management features provided by your Android device or by removing the App, subject to any device backup or restore functionality controlled by you, Android, your device manufacturer, or another platform provider.

Because local gameplay information is not intended to be stored in a developer-controlled user account, we generally cannot remotely delete information that exists only on your device.

Support Communications

Information you voluntarily send to us may be retained only for as long as reasonably necessary to:

- Resolve your request;
- Maintain appropriate support records;
- Protect against abuse;
- Comply with legal obligations; or
- Establish or defend legal claims.

We may delete or anonymize such information when it is no longer reasonably required for these purposes.

11. Data Security

We use reasonable administrative, technical, and organizational safeguards appropriate to the nature of the information we process.

Bumper Bloom Puzzle is designed to minimize privacy risk by keeping its normal game progression locally on the user's device and avoiding the need for a remote game account.

Where information is transmitted to us through a support or communication service, we take reasonable steps to use reputable services and restrict unnecessary access to that information.

However, no method of electronic storage, device storage, or internet transmission can be guaranteed to be completely secure. Users should also protect their devices with appropriate operating-system updates, screen locks, account security, and other available security features.

12. Your Privacy Rights

Depending on where you live and applicable law, you may have rights concerning personal information that we process about you.

These rights may include the right to:

- Request access to personal information;
- Request correction of inaccurate information;
- Request deletion of personal information;
- Restrict certain processing;
- Object to certain processing;
- Request data portability where applicable;
- Withdraw consent where processing is based on consent;
- Request information about how personal information is processed; and
- Lodge a complaint with an appropriate data-protection authority.

The European Commission identifies rights under the GDPR including access, rectification, erasure, restriction, portability, objection, and rights concerning certain automated decision-making.

To exercise a right relating to information held by us, contact:

[PRIVACY CONTACT EMAIL — REQUIRED BEFORE PUBLICATION]

We may need sufficient information to understand your request and, where legally necessary, reasonably verify your identity.

These rights are subject to limitations and exceptions under applicable law.

13. Locally Stored Data and Privacy Requests

Some privacy rights apply only to information that a business or controller actually possesses or processes.

Because Bumper Bloom's ordinary gameplay information is intended to remain locally on your device, we may have no server-side copy of your game progress to access, correct, export, or erase.

You may manage information stored on your device using applicable device storage controls.

If you contact us and we separately possess personal information contained in your support correspondence, you may request applicable access, correction, or deletion of that information using the privacy contact address above.

14. California Privacy Rights

If you are a California resident and the California Consumer Privacy Act, as amended by the California Privacy Rights Act ("CCPA"), applies to us, you may have rights including:

- The right to know what categories or specific pieces of personal information have been collected;
- The right to know the purposes for which information is used;
- The right to know categories of third parties to which information is disclosed;
- The right to request deletion, subject to legal exceptions;
- The right to request correction of inaccurate personal information;
- The right to opt out of the sale or qualifying sharing of personal information;
- The right to limit certain uses of sensitive personal information where applicable; and
- The right not to receive unlawful discriminatory treatment for exercising CCPA rights.

These rights are reflected in guidance from the California Attorney General.

California Sale/Sharing Disclosure

For the current Bumper Bloom Puzzle release:

- We do not intentionally sell personal information;
- We do not intentionally use personal information for cross-context behavioral advertising;
- We do not intentionally collect sensitive personal information through ordinary gameplay for purposes that would require a CCPA right-to-limit mechanism.

If these practices change, we will update this Privacy Policy and provide any legally required choices.

15. Children's Privacy

Bumper Bloom Puzzle is intended for a general audience and is **not specifically directed to children under 13**.

We do not knowingly request names, email addresses, precise location, contacts, account credentials, or other personal information from children through ordinary gameplay.

If we become aware that personal information has been collected directly from a child in circumstances prohibited by applicable law, we will take reasonable steps to delete that information.

Parents or legal guardians who believe a child has provided personal information directly to us may contact:

[PRIVACY CONTACT EMAIL — REQUIRED BEFORE PUBLICATION]

If the App is designated in Google Play Console as targeting children or a mixed audience that includes children, the developer must ensure that the actual release configuration, SDKs, advertising practices, and Play Console declarations comply with Google Play Families requirements and applicable children's privacy laws. Google Play imposes additional requirements on apps whose target audience includes children.

16. No User Accounts

Bumper Bloom Puzzle does not currently require or provide a user account for normal gameplay.

Accordingly, there is currently no Bumper Bloom online account containing gameplay data that a user must separately request to delete.

If account creation is introduced in the future, we will update this Privacy Policy and provide account-deletion mechanisms required by applicable law and Google Play policy.

17. International Data Transfers

Ordinary gameplay information is intended to remain locally on your device.

If you voluntarily contact us, your communication may be processed using service providers operating in countries other than your country of residence.

Where GDPR or another applicable law requires safeguards for international transfers of personal information, we will use an appropriate lawful transfer mechanism where required, which may include:

- An adequacy decision;
- Standard Contractual Clauses;
- Another legally recognized transfer mechanism; or
- An applicable statutory exception.

The European Commission provides Standard Contractual Clauses as one recognized mechanism for certain transfers of personal data outside the EU/EEA.

18. Automated Decision-Making and Profiling

Bumper Bloom Puzzle does not intentionally use personal information to make decisions that produce legal or similarly significant effects on users.

The current game does not require a personal profile for ordinary gameplay.

19. Tracking Technologies

The current release is not intended to use cookies, advertising trackers, or cross-app tracking technologies as part of ordinary gameplay.

Locally stored game state or application storage used to remember progress or preferences is used for game functionality rather than cross-service behavioral advertising.

If tracking technologies are introduced in a future version, we will update this Privacy Policy and obtain consent where legally required.

20. Third-Party Platforms and Google Play

When you download or use Bumper Bloom Puzzle through Google Play, Google may independently process information associated with your Google Play account, device, download, purchase history, security, diagnostics, or use of Google Play services.

Such processing is performed by Google under its own terms and privacy practices and is separate from information controlled by the Bumper Bloom developer.

21. Google Play Data Safety

Google Play requires developers to provide a clear and accurate Data Safety section describing user-data collection, use, and sharing, including relevant activity performed by SDKs incorporated into an app. Google also requires the Data Safety disclosure to remain consistent with the app's actual privacy practices and privacy policy.

Based on the intended current Bumper Bloom Puzzle configuration described in the available project materials:

- The game is designed for offline gameplay;
- No user account is required;
- Game progress is stored locally;
- Advertising is disabled in the no-ads release;
- The game does not intentionally transmit personal gameplay profiles to a developer-controlled backend.

The release build must nevertheless be reviewed whenever dependencies, SDKs, permissions, analytics, crash-reporting tools, advertising systems, or network functionality change. The project's own build report notes that the final Data Safety disclosure must match the exact SDK configuration shipped to users.

22. Changes to This Privacy Policy

We may update this Privacy Policy when:

- App functionality changes;
- Data-handling practices change;
- New SDKs or service providers are introduced;
- Advertising or analytics practices change;
- Applicable laws or regulatory requirements change; or
- Google Play requirements applicable to the App change.

When we make material changes, we may provide notice through an App update, the Google Play listing, an in-app notice, or another appropriate method.

The “Last Updated” date at the beginning of this Privacy Policy will indicate when the latest version became effective.

Where applicable law requires consent to a new processing purpose, we will request that consent before beginning the relevant processing.

23. Contact Us

For questions about this Privacy Policy, privacy practices, or requests concerning personal information, contact:

Developer / Company: [DEVELOPER OR COMPANY LEGAL NAME — REQUIRED]

App: Bumper Bloom Puzzle

Email: [SUPPORT OR PRIVACY EMAIL ADDRESS — REQUIRED]

If required by applicable law, additional business address or data-protection representative information should be added here.

24. Google Play Privacy Policy Publication

This Privacy Policy should be made available through the privacy-policy field in Google Play Console and through a privacy-policy link or text accessible from within Bumper Bloom Puzzle.

Google Play currently requires app privacy policies to comprehensively disclose applicable user-data practices and to be hosted at an active, publicly accessible, non-geofenced, non-editable URL rather than solely as a PDF.

The information submitted in Google Play's Data Safety form must be reviewed whenever the release build changes so that the Play Store disclosure remains accurate.

25. Legal Disclaimer

This Privacy Policy is intended to provide a general privacy disclosure for Bumper Bloom Puzzle based on the App practices and configuration described above and to support compliance with applicable privacy requirements.

It does not constitute legal advice and does not create an attorney-client relationship.

Privacy, consumer-protection, children's privacy, international-transfer, and mobile-platform requirements vary by jurisdiction and may depend on facts specific to the developer, company, target audience, SDK configuration, distribution countries, and business activities.

The developer should have this Privacy Policy and the final Google Play Data Safety declaration reviewed by a qualified legal professional before publication, particularly if the App later introduces advertising, analytics, accounts, cloud storage, purchases, social functionality, user-generated content, location access, or other collection of personal information.
