Privacy Policy for Smart AI Steps Recorder

Last Updated: March 8, 2026

This Privacy Policy describes how the Smart AI Steps Recorder ("the Extension") handles user data. We are committed to protecting your privacy and ensuring that your data remains under your control.

1. Overview

Smart AI Steps Recorder is a productivity tool designed to help users document browser interactions as human-readable test steps. The Extension operates primarily on your local device.

2. Data We Collect

To provide its core functionality, the Extension processes the following information while a recording session is active:

Web History (URLs): We record the URLs of the pages you visit during a recording session to include "Navigate to" steps in your documentation.
User Activity: We monitor clicks, form inputs, and keyboard interactions to translate these actions into written instructions.
Website Content: We read metadata from the websites you interact with, such as button labels, field placeholders, and ARIA labels, to provide context for recorded actions.

3. How Data is Used

Collected data is used solely for the purpose of generating human-readable documentation of your browser interactions. This information is processed locally on your device to create the "Steps to Reproduce" text.

4. Local Storage and Data Security

Local Processing: All recorded data is stored locally on your device using chrome.storage.local.
No Remote Transmission: The Extension does not transmit your recorded data, browsing history, or any other personal information to any external servers or third parties.
Sensitive Data Masking: The Extension is designed with "Privacy-First" logic. It automatically detects and masks sensitive fields (such as passwords and credit card information) to ensure they are never recorded or displayed in your output.

5. Third-Party Sharing

We do not sell, trade, or otherwise transfer your data to third parties. Your recorded steps remain on your local machine unless you explicitly choose to copy, export, or share them yourself (e.g., by copying to a bug tracking system).

6. Data Retention and Deletion

You have full control over your data. You can clear your recorded steps at any time through the Extension's interface. Uninstalling the Extension will also remove all data stored in chrome.storage.local.

7. Changes to This Policy
We may update our Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date.
