Volunteer Positions

Below is a list of desired positions that we would like to help us with our Corrent project. Please realize that we have a wide variety of projects that we are working on, which require very different levels of skills and technical knowledge. Please understand that there is an essentially 0% chance that you will be paid anything (this entire thing is a volunteer project, and we are losing money as it is).

Supporter: By using Corrent, you are already a supporter, but why not go *just a little bit* out of your way to help us even more. Why not tell your friends and other people online about the cool service that you are using? How about considering a monetary donation with the anonymous cryptocurrency Monero (coming soon)? Every little bit helps <3

Uploader: upload movies and TV shows to the site. Anyone with a computer can do this. No minimum time commitment. Learn more by clicking here.

Moderator: manage files on Corrent, looking for falsely reported uploads and similar tasks. Prerequisite of helping with another task first.

iOS Developer: develop applications for the Apple iOS platform.

Android Developer: develop applications for the android platform.

Windows/Mac/Linux Developer: develop desktop applications for these platforms.

Web Developer: knowledge of HTML, CSS, etc.

Server Configuration: the ability to work with server infrastructure to improve backend performance. You will be working with a test server the majority of the time.

Designer: creating markups for potential redesigns of the site. We may prefer some designers who help more than others, but anyone with PowerPoint, Gimp, Photoshop, etc. can help by submitting designs and ideas.

Public Relations Associate: help by spreading positive knowledge to multiple, targeted demographics as determined by the lead of the PR Department.

Interested in any of these? Download Threema (an excellent, private messaging app) and send your desired volunteer position, qualifications, and your unique QR code or username to us on Reddit or Facebook.
