

The Historical Event

-
- For this project you will pick an historical event and create a web site about it
 - You could have the battle of Gettysburg, the building of the pyramids, the creation of the atomic bombs or any event of interest to you relating to history
 - You should have a title page that has links to at least four other pages
 - You should have one page of pictures, but the other pages on your web site should be decorated with pictures also
 - You should have one page that has a JavaScript quiz on it. You should have at least 10 questions. There is an example for you to follow [here](#)
 - We are spending two full classes, as well as your time at home on this project, so make it look as good as possible.
