Previous session notes

- [2022-11-16 golang-tools session](#)

Details

When: 16:00 UTC ([shared calendar](#)) (We use 16:00 London time, to adjust for DST in US/UK/EU)

Meet: <https://meet.google.com/xuq-tcoc-dkp>

Volunteer running the call: Daniel Martí

Agenda

- **Start recording the session!**
- Meta discussion:
 -
- ide/editor/tools
 - (mvdan) FYI for gopls: gofumpt now vendoring go/printer - [gofumpt/pull/255](#)
 - i. (bcmills) Might be worth proposing a language-version field in printer.Config for extended compatibility.
 - rsc's proposal for extended compatibility ([#56986](#)) is related. (Using GODEBUG settings based on the main module's go version instead of an explicit Config parameter.)
 - (mvdan) want to reach a decision on the "exit code" flag for gofmt - [46289](#)
- cmd/go
 - currently working on graph pruning bug & repo authentication UX
 - may be more proposals in the 1.21 cycle
- Misc
 - (mvdan) x/playground: easily runs into build timeouts by downloading modules - [56977](#)
 - i. (bcmills) <https://go.dev/cl/460635> ([#57495](#)) is closely related: we were also hitting timeouts just building the standard library.
- What are people working on going forward? Anything interesting to share?
 - ([picatz](#)) released [taint](#) analysis package and demo [sqli](#) CLI tool. Related [blog post](#). Generally looking for feedback. Would love to include this along other [go/analysis](#) packages in the future, if there's interest!
 - (mvdan) started using github.com/icholy/gomajor and I'm very happy with it!
 - i. [#32014](#) tracks support in cmd/go
 - (rfindley) gopls moving toward using export data
 - (hyangah) want more feedback on [govulncheck](#), vscode-go/gopls's [vulncheck features](#)
- Volunteer for running the next session
 - Who: Daniel Martí
 - When: 2023-02-22
