## **Rationale**

I wrote a report about the censorship in America (EEUU). It was written with a serious tone, because the censorship is very important and dangerous in America, the audience are adult.

In my report I tried to use formal language, because this report is not a joke. I used these phrases " According to", "Curiously". I tried as well to use a specific level of vocabulary, because this topic need a specific vocabulary like: "offensive" and "definition".

Using these elements I feel I reached my aim of this topic, is to people are interesting what is censorship in America, because many people don't know what is censorship and to open his eyes to know what is censorship and the consequence produce in people. The sociologically effects in the people and who channel transmit. And the open conclusion with a question to the audience who read this report is very interesting.

## **Written assignment**

# Censorship in America

The aim of this report is to evaluate and describe what is censorship in America, and what purpose have. It is based on three differents sources. To start this report you need to know the definition of censorship, according to the text "What is censorship?": "Censorship is the suppression of words, images, or ideas that are offensives".

On the other hand, in the T.V who present a program of children the parents have the authority of what to show to their children, as John Danz jr said: "However, with the advent of child block and parental control, parent have the choice to block that which considered".

According to the previous definition, the censorship are applied in T.V, newspaper, etc. The censorship are controller by the government of America to use censorship in a specific situation, as said in the text "what is censorship": "Censorship by the government is unconstitutional". On the other hand, censorship can destroy a channel or people who see this channel, because the censorship is allied to the government to

be used in suitable situation, for example, John Danz jr said: "February 1, 2004 during the halftime show of Super Bowl XXXVII... ". In this event the T.V. censure the problem of the music by Michael Jackson, but the people don't know what cost need to pay the channel to Michael of this problem.

To conclude censorship debate will continue for years, but to chose this report I will leave a question to debate on this topic. Since you need to reflect on this, because if you see what I said above the censorship is offensive to people above all in sociologically. The question is: How can fight to censorship?, reflect.
