## SECTION -A (READING)

## Q1. Read the following passage and answer - (8M)

How do humans and other animals communicate with each other? Of course, humans communicate verbally by talking and making other sounds like laughing. Most other mammals also communicate by making sounds as well. Sophisticated intelligent mammals ,especially dolphins and whales, possess well developed verbal skills and communicate with high pitched sounds that carry through the water. Researchers are actively working on interpreting these sounds in order to understand dolphin and whale language. Verbal communication is accompanied by non-verbal body language that also conveys meaning and emotion. Body language includes facial expression, posture, position of the arms and many other cues that help in understanding the meaning of verbal communication. In the absence of verbal communication, body language can be sufficient to convey meaning. Sometimes merely a stern look from Mom or Dad or a teacher, lets you know that you are not behaving properly, no words are necessary.

## Q2. Read the following passage and answer -(7m)

When I came home from the hostel for the first time, I was looking guite depressed and pale. I had lost interest in food and this naturally showed in my dull face and sunken eyes. But after the vacation when I set off from the hostel, there as a servant walking along with me with a huge tin of homemade ghee and a large sack of super-fine rice. His name was Hari and he had brought it from his home. He was very particular about his food. He began to cook my food separately in the hostel.

Day by day I grew pink and strong. I generally survived on rice and slept a lot. Once I slept for thirty six hours at a stretch. Having a short nap after the breakfast became my hobby. For that I used to miss my lunch too
