

PLUG - Request for Tender RFT2019-01

What problem are we trying to solve?

UGMM's outdated requirements are preventing us from migrating it off our old Server. So we require a programmers skills and experience.

Tasks:

- Update UGMM code to run on PHP 7.0.33 on Debian 9
- Based on <https://github.com/plugorgau/ugmm/tree/php7>
- Tested to show it runs on PLUG Server Debian 9 (with no additional repos, in a subdirectory).
- What license will the work be under? Existing ugmm license (GPLv3+).

Prerequisites:

- Experience working on Debian Servers, LDAP, Apache and Nginx.
- Have coded with PHP.

Time and Cost:

- Allow up to 7 days of time to complete, from job start.
- Cost of the work is no more than \$150 AUD.
