After 3 years of hard work, we were denied a visa because we have doubts that the musicians will return to their country of origin before the expiration date of the visa requested. However, we have signed with a French Label @helicomic360 for an album of 14 tracks to be recorded in Kinshasa and a documentary film about the group to be released in Kinshasa in January 2023. The stay in France between December 05 and December 11 of the musicians is articulated around an artistic residence, 3 important concerts and media appointments. Of course Hélico will guarantee the smooth running of their trip and will cover 100% of their living expenses.
