

Outreach Practise

Subject Line: **Mobvoi's "Project" Collaboration...** 

Hey Team Mobvoi!

It definitely shows the "coolness" of your watches being able to take the icy and cold conditions and keep functioning with powerful results. (See what I did there 😊❄️).

Improved: As a secondary school student, I'm working on a business studies project, involving me to understand the challenges faced in the (best industry) in fitness technology.

It definitely shows the POWER in your smartwatches as your TicWatch Pro 5 can withstand the strong environmental stresses such as rain, sand, ice, shock, and vibration.

~~So obviously I chose the best realm in the fitness technology industry~~  .

In return for all of this, I will provide you with some recommendations and solutions that could potentially help grow your business.

To find out the information needed for the research, I need to ask 10 questions that are about Mobvoi's struggles and goals to give me a better understanding of trends and obstacles faced in the fitness technology field.

Would it be possible to send these 10 questions to someone from your team?

Let me know if so :)

Regards,

Zak Smith
