

Tutorial Week 10

Our readings (lecture notes and video lecture) this week discuss the **Enterprise JavaBean (EJB) components (EJB)**. Write the answers for all questions in the table according to your understanding. **PLEASE USE YOUR OWN WORDS. DO NOT COPY FROM THE WEB.**

Questions	Answers
1. To run an EJB application, what do you need?	
2. How many types of EJB? Describe the types of EJB.	
3. Why we need to use EJB for remote access?	
4. Describe the different between stateless and stateful session beans. Give examples for stateless and stateful session.	
5. Explain the steps to create a stateless EJB module.	
6. Why Java Beans is less complex than EJB?
