

PropertyPilot

Privacy Policy

Effective Date: May 6, 2026

Overview

PropertyPilot is a Chrome browser extension designed to help small landlords track tenants, rental payments, and property expenses. This Privacy Policy explains how PropertyPilot handles your data.

The short version: PropertyPilot does not collect, transmit, or store any of your data outside of your own browser. Everything stays on your device.

Data Storage

All data entered into PropertyPilot — including tenant information, payment records, and property expenses — is stored exclusively in your browser's local storage (Chrome's localStorage API). This means:

- Your data never leaves your device
- No data is sent to any server
- No data is stored in the cloud
- No internet connection is required to use PropertyPilot
- Only you can access your data

Data We Do Not Collect

PropertyPilot does not collect, access, or transmit any of the following:

- Personal information (name, email address, phone number)
- Financial information (bank accounts, credit card numbers)
- Tenant or lease data
- Payment records or transaction history
- Usage analytics or behavioral data
- Device information or browser fingerprints
- Location data
- Cookies or tracking identifiers

Third-Party Services

PropertyPilot does not integrate with any third-party services, APIs, or analytics platforms. The extension operates completely offline and makes no external network requests.

Chrome Permissions

PropertyPilot requests only the following browser permission:

- storage — Required to save your rental data locally in Chrome's localStorage. This permission is used solely to persist your data between browser sessions.

PropertyPilot does not request access to your browsing history, other tabs, websites you visit, or any other browser data.

Data Backup and Restore

PropertyPilot provides a manual backup feature that allows you to export your data as a JSON file saved to your computer. This file is under your control at all times. PropertyPilot does not upload or transmit this file anywhere.

If you choose to store your backup file in a cloud storage service (such as Google Drive or Dropbox), that storage is governed by the privacy policy of that service, not this policy.

Data Deletion

You can delete all PropertyPilot data at any time by using one of the following methods:

- Use the "Clear All Data" option in PropertyPilot's Settings tab
- Uninstall the PropertyPilot extension from Chrome
- Clear Chrome's browsing data and select "Hosted app data"

Once deleted, your data cannot be recovered unless you have a backup file.

Children's Privacy

PropertyPilot is intended for use by adults managing rental properties. The extension is not directed at children under the age of 13, and we do not knowingly collect any information from children.

Changes to This Policy

If this Privacy Policy is updated, the new version will be made available on the Chrome Web Store listing page. Continued use of PropertyPilot after any changes constitutes acceptance of the updated policy.

Contact

If you have any questions about this Privacy Policy or PropertyPilot's data practices, you can reach out via the Chrome Web Store support page for this extension.
