Abstract

Abstract writing using Times New Roman 12pt font, single spaced and italicized. Abstracts are written in one paragraph and no more than 250 words. Abstracts are written in English which briefly contain a description of the problem and research objectives, time and place, methods used, and research results. Abstract followed by keywords that contain basic ideas or concepts that represent the field being discussed/researched. Keywords consist of 3-5 words. Article length ranges from 10-15 pages including references and typed 1 space in A4 format.

Keywords: list a maximum of 5 keywords separated by commas.

Introduction (14)

The introductory section is written in Times New Roman font, single line spacing, and font size 12. Page margins are formed as in this template and spaced 1. This section contains research problems, research solution plans, research objectives. Outline the things that interest the reader and provide context for the issues discussed, state the issues discussed and the purpose of the discussion. The literature cited must be in accordance with the research subject, presented clearly in the introduction. The citation style is as follows: The problem that is often faced by farmers is the high mortality rate in the larval phase (Rosyadi et al., 2019). According to Canelli et al. (2020), *Chlorella* sp. contains carbohydrates ranging from 8.5-20.4%, protein 59.6-65.6%, fatty acids 8.4-11.2%.

Research methods*Subchapter(12)*

The research methods include time and place, materials and tools, methods used, parameters used, and data analysis. the method used must be clearly stated and subtitles used when necessary

Results and Discussion*Subchapter(12)*

This section presents the research results. Research results can be supplemented with tables, graphs (pictures), and/or charts. The discussion section describes the results of data processing, interprets the findings logically, links them to relevant reference sources.

Each table or figure is given a serial number, title, which corresponds to the contents of the table and figure, and the source of the quotation, if any. The source of the quotation is written below the image or table, Times New Roman font size 12. The table title is written above the table and the image title is written below the image. Tables or images must be placed in the body text and meet the standards for printing.

Conclusions and recommendations

Presenting research conclusions and suggestions that refer to research results.

Bibliography

Contains the sources referred to in writing the article, only the sources used are included in the bibliography. References can come from books, journals or seminar proceedings and the website. Writing a bibliography using a reference manager application program such as: Mendeley, EndNote, or Zotero, and so on, which is written into 1 column of writing.
