

Protecting Our Athletes

Your Role in Locker Room Safety

Locker room monitoring protects privacy, prevents misconduct, and builds trust. Your presence helps ensure every athlete feels safe, respected, and supported.

Key Responsibilities

- **Two-Deep Rule:** Always have two screened adults present.
- **Same-Gender Monitoring:** Assign monitors who match the athletes' gender **whenever possible**.
- **No Cell Phones or Cameras:** These are strictly prohibited in locker rooms.
- **Privacy First:** Athletes must change in designated private areas.
- **SafeSport Compliance:** All monitors must complete **training** and pass background checks.

Concerns

- Unscreened adults entering locker rooms
- Cell phone use or photography near athletes
- Confusion about gender-specific monitoring roles
- Failure to document **and** report concerns

In the Locker Room

- Athletes must change in private areas only.
- Monitors should remain present until all athletes have exited.
- Report any concerns immediately to the designated SafeSport contact.
