Received: date / Accepted: date

ABSTRACT: This document is a template for use by authors who will send their manuscripts to *Jurnal Ilmu Kefarmasian Indonesia*. The title of the manuscript must be written in lower case except for the first word and proper nouns. Author names must be given in full, with surnames (family names) all in capitals. Author addresses must be given in English in the following order: Department, Faculty, University, City, Postal code, Country, with numbers in superscript after each author name to indicate his/her address. Do not use footnotes for the addresses. The corresponding author's telephone, fax numbers and E-mail address must be clearly given, marked with an asterisk. The abstract must not be longer than 250 words (for research and review articles) and must clearly state the study's purpose and results. The abstract must not contain any reference citations. The key words must be separated by semicolons and should not include acronyms.

KEYWORDS: Keyword-1; keyword-2; keyword-3; keyword-4; keyword-5. Use semicolons (;) as separator with alphabetical order.

▪ INTRODUCTION

In this section, the authors should state the objectives of the work, define the scope of your paper, summarize relevant work to the study being reported and provide an adequate background. A detailed literature survey or a summary of the results should be avoided. It should not be a review of the subject area, but should finish with a clear statement of the question being addressed. The introduction must be designed to inform the reader of the rationale and significance of the study. Do not leave blank lines or paragraph spacing between the adjacent paragraphs.

▪ MATERIALS AND METHODS

Names of products and manufacturers (with locations) should be supplied for all mentioned equipment, instrument, chemicals, animals, etc, for example: soy lecithin was purchased from Lipoid (Lipoid S 100, Ludwigshafen, Germany). Brand names may be used only once in the manuscript. For example; you can mention that "XYZ® tablets containing Esomeprazole (Formulation A) were generously provided by ABC Pharmaceuticals" in Materials and Methods section. However, in other parts of the manuscript, it must be mentioned as "commercial tablets containing Esomeprazole" or Formulation A, not XYZ® tablets.

The experimental procedures should be described in sufficient detail to enable others to repeat the experiments.

Use the headings of your manuscript as follows:

SECTION HEADINGS

First level subheading

Secondary level subheading

Do not use subheadings more than secondary level subheading. Do not change numbering style of the journal. **Do not use subheadings more than third order**

For example:

How to cite this article: Firstname Lastname^{1*}, Firstname Lastname², Firstname Lastname³. "title", Affiliation. JIFI. 2023; 1(2): 1-7.

Materials

Chitosan (Sarchem Labs, New Jersey, USA), sodium tripolyphosphate (Arrow Fine Chemicals, Gujarat, India), PVP K-30 (DC Fine Chemicals, Barcelona, Spanyol), dimethyl sulfoxide (Merck, Darmstadt, Jerman), propylene glycol (Dow Chemical Pacific, Singapura), ethanol 96%, quercetin (Sigma, Missouri, USA).

Kenikir leaf extraction

The Ultrasound-Assisted Extraction (UAE) method using 96% ethanol was used to produce kenikir leaf extract. Hundred grams of kenikir leaf powder with 1000 mL of solvent (1:10 ratio) was extracted at 40°C for 30 minutes using an ultrasonic bath with a frequency of 50 kHz. The filtrate was collected and concentrated using a rotary vacuum evaporator (pressure 175 mbar, temperature 40°C, speed 70 rpm) to obtain a crude extract of kenikir leaves. The concentrated extract was weighed, and the yield value was calculated.

Characterization of kenikir leaf extract

Organoleptic

The organoleptic examination was done by visual observation based on shape, color, and smell compared to the Indonesian Herbal Pharmacopoeia.

Water content

The water content of the kenikir leaf extract was carried out using the Karl-Fischer Titration method.

RESULTS

Results should be clear and concise. The results of the research carried out must be written down in stages in the form of subheadings. Result Text, tables and figures must show minimal overlap, and must be internally consistent. Tables and figures should be designed to maximize the presentation and comprehension of the experimental data. Attention should be paid to the matter of significant figures (usually, no more than three). The same data should not be presented in more than one figure or in both a figure and a table. **As a rule, interpretation of the results should be reserved for the discussion section of a Research Article, but under some circumstances it may be desirable to combine results and discussion in a single section.**

All tables and figures must have a caption and/or legend and be numbered (e.g., Table 1, Figure 2), Captions must be written in sentence case. **Make sure the table is not in picture form.** Table headings should be given above the table and figure legends should be given below the figure. **Tables and figures should be inserted into the related sections, after their first mentioning in the text.** Do your best to place tables or figures at the top or bottom of any page, where possible. You can also submit your figures as separate files in PNG or JPEG format, if necessary. **Please provide as high-quality images as possible for the figures.**

Table 1. Table heading should be written in sentence case. Use this font and size (Book Antiqua 9) and leave 1 cm from each page margin. Use bold characters only when necessary. This is an example for table layout.

Column A	Column B	Column B	Column C	Column D	Column E	Column F
Entry 1	Entry 4	Line 1	1.00×10^{-5}	0.123	1.00	75
		Line 2	1.25×10^{-5}	0.456	2.50	80
Entry 2	Entry 5	Line 1	2.00×10^{-5}	0.789	10.00	85
		Line 2	2.50×10^{-5}	0.987	25.00	90
Entry 3	Entry 6	Line 1	5.00×10^{-5}	0.654	50.00	95
		Line 2	7.50×10^{-5}	0.321	100.00	100

Table must given a caption or note. Table captions should be written in sentence

Type 1

Figure 1. Figure captions should be written in sentence case – use this font and size (Book Antiqua 9) and leave 1 cm from each page margin. If present, footnotes should be Book Antiqua 8. Legends should be concise but explanatory. Do not use labels such as Fig., Scheme, Illustration, Graphics. Make sure that all Figures have been cited in the text properly. If you prefer to add a footnote under your figure caption, apply the same principles described for tables.

Type

2

(a)

(b)

Figure 2. This is a figure, Schemes follow the same formatting. If there are multiple panels, they should be listed as: (a) Description of what is contained in the first panel; (b) Description of what is contained in the second panel. Figures should be placed in the main text near to the first time they are cited. A caption on a single line should be centered.

DISCUSSION

The Results and Discussion sections may be combined. The purpose of the discussion is to interpret significance of the results and to relate them to existing knowledge in the field in as clear and brief a fashion as possible. Information given elsewhere in the manuscript should not be repeated in the discussion. Extensive reviews of the literature should be avoided. It is recommended that this discussion section contain comparisons and in-depth discussions of research results obtained with the literature.

CONCLUSION

The main conclusions of the study should be presented in a short Conclusions section, which stands alone. You should explain whether your findings supported your hypothesis in this section. Avoid using references in conclusion section.

Acknowledgements: Input text here.

Funding: Input text here

Conflict of interest statement: Fill in this section according to the signed conflict of interest statement when submitting your article. If there is no conflict of interest to be declared by any of the authors, write "The authors declared no conflict of interest" in the manuscript.

REFERENCES

References must be numbered in order of appearance in the text (including citations in tables and legends) and listed individually at the end of the manuscript. Minimum references were 15 with. The majority of sources, specifically 80%, consist of literature that has been published during the past 5 years. We recommend preparing the references with a bibliography software Mendeley with **IEEE Style**.

IEEE citation style includes in-text citations, numbered in square brackets, which refer to the full citation listed in the reference list at the end of the paper. The reference list is organized numerically, not alphabetically.
