

Lesson 5 - It's All About You

A42

For this project you will create a program that will tell us a little bit about you

- You can select a main sprite and then have him tell us some things about you
- You can make your own sprites by uploading them and then make them appear to show something about you
- For example, if you are a big fan of Lebron James you can have your sprite say that and then make a sprite of a Lebron James picture appear for 20 seconds, and then you can hide it
- You can keep using this process to show us different things about us
- You can make the sprite move to different parts of the screen where there are small sprites. You can then make those sprites get bigger as you discuss some aspect of your life.
- You could have a sprite of yourself discussing your life. You could have a series of flash cards pop up, one at a time, as you talk about yourself
- You could show maps of where you were born or places you have been
- You can have pictures of yourself as a sprite with different costumes
- You can tell us what you would like to do in the future
