Subject line: MAD about being POOR because of the banks

I was paying so much money to a prestigious bank that I almost ended up being poor.

It was so sketchy, so complicated and I couldn't understand how I was left with almost nothing.

I made an installment at the bank to buy a house. I thought it was a good idea and I can save money without paying the entire price.

I WAS WRONG.

All banks have commissions and a good structure. I didn't know anything about them till I was struggling with paying a monthly bill which increased in time.

When I realized something wasn't right I was searching for information about how banks work, how they are always on profit. In the end , you will pay more for...nothing.

They increase the price, they make you offers, they have a professional language and a well structured hidden technique.

I tried my best to find the key to escape from this but it felt...impossible. After a few months, I was done with this bank and I escaped from this "matrix". You should avoid prestigious banks because it's dangerous.

The amount of money you should pay monthly and It will be increased from different ways, not announced and they will force you to do stuff.

Now I am at the best point of my life, saving money, I'm increasing my profit and spending money in a smart way.

You can learn more about banks down below. Let's make a change and take action NOW. Knowledge means power.
