Subject: Recommendation for Rachel Brown

To Whom it May Concern:

As Rachel Brown's teammate at Harmony Science Academy for the past ten years. I have greatly benefited from her creativity, work ethic, and willingness to do whatever takes for her students to achieve their goals.

Over the years Ms. Brown has held various educational positions with Harmony Science Academy always having the students' best interests at heart. Currently, Ms. Brown holds the position of STEM teacher for grades Kindergarten-5<sup>th</sup> grade. She is responsible for teaching, following, and implementing the PTLW Elementary Stem Curriculum. In addition to her classroom responsibilities Ms. Brown has made great contributions outside of the classroom. The one that stands out is the implementation of our school garden and outdoor learning center. Ms. Brown founded the idea, wrote grants to obtain the funds to create an outdoor learning experience for all students and teachers to enjoy for years to come. This is just one of the many wonderful opportunities Ms. Brown has spearheaded for our educators and students.

In conclusion Ms. Brown would be an incredible asset into any educational role you would be offering. If you have any questions, please contact me.

Sincerely,

Talia M. De La Cruz
