

Made by Maddy and Elouise

What is Quiddage?

Its like having your own business and buying off other people's shops but with snidges that you have erent on our rotation board

What kind of Products can you design?

it good to do something creative yet good quality and quick cause you need to make alot of your product.

What things do you have to do to a product for it to be approved?

You have to go through a technology process of changing something into something else eg normal popcorn into coloured popcorn, biscuits/ice blocks using a unique ingredient that is changed by you, a game that you design, jewelry that is home made by you using recycled products.

How many people can be in your group?

as many as you want but it's better to have a small group because you have to share out your snidges at the end

What about recycled products?

if you do have recycled products because you get a bonus extra snidge

What about taxes?

these s are

Sugar Tax – (Sugary Foods) - 70%

Real Money Tax – (Spent above \$5) – 30%

Recyclable Tax – Total Recycled Product - + 40%

Game and Activity Tax - + 20%

Plastic/Paper Cup Use - - 20%

Advertising on paper - 10%

QUIDDAGE DIRECTION:

- Create a plan- details about your product/s, what is it made of and how you will make it. **See table below**
- INGREDIENTS / MATERIALS / EQUIPMENT & STEPS TO MAKE IT. present this to Mr bron/Miss Bradshaw for approval on google doc
See table below
- Create an advertising poster (This must include your product, a slogan or advertising logo and the price. Be prepared to change your pricing as weeks go on. You could also do loyalty cards etc

IMPORTANT TO NOTE

*DRINKS / FOOD- you have to tell me in a few sentences HOW you will prepare it safely and and serve it cleanly. How will you do this every 2 weeks. Are you doing it or your parents

MR MCCALLUM is our HEALTH INSPECTOR and he will tax you if your store is not clean.

STORE BOUGHT ITEMS ARE A NO-NO!!!!!!

You MUST make the product yourself or combine SOME store-bought items to make a PRODUCT.

It must follow the TECHNOLOGY PROCESS.

What you are to do next.... Make a copy of this document and share with Mr bron

TECHNOLOGY PROCESS-

Plan it (include materials and ingredients) - **Plan this using the table below**

Make it (you could make a PROTOTYPE) **Bring this next Friday to share**

Reflect on it (what could you change?) **Class/Teacher Feedback**

Change it (how will you adapt it to make it better?) **Class/Teacher Feedback**

Sell it (who will you sell it to?) **Self Reflection/Class Feedback**
