Our Jewelry

Materials & Construction

AR Luxe pieces are made using **316L stainless steel**, a premium-grade metal widely recognized for its strength, corrosion resistance, and skin-safe properties. This material is commonly used in medical and luxury applications due to its reliability and durability.

- **Hypoallergenic:** Safe for sensitive skin and nickel-safe
- **316L stainless steel:** Resistant to rust, tarnish, and corrosion

- **Designed for daily wear:** Strong, lightweight, and long-lasting

Gold Plating Process

Our gold-toned jewelry is finished using an advanced **PVD plating process**, coated with **18K gold**. PVD (Physical Vapor Deposition) creates a bond that is significantly more durable than traditional plating methods, resulting in a richer color and extended wear life.

- **18K gold PVD plated**
- **Water-resistant:** Suitable for everyday exposure to water
- **Fade-resistant finish:** Maintains color and shine longer

Care & Wear

AR Luxe jewelry is designed to be worn confidently. Our pieces are water-resistant and suitable for daily use; however, we recommend avoiding prolonged exposure to harsh chemicals to preserve the finish over time.
