

How to download Onstream Movie app via downloader on firesticks

If you already have the Downloader App installed, skip to step 9. If your firestick is jailbroken already but you don't have downloader app installed, skip to step 5.

1. From the Home screen on your Fire TV Device, go to Settings at the end of the middle row. If your firstick has been updated to the new look it is at the top left corner, press the three lines and then go down to settings.
2. Then go to My Fire TV, Press About, Press on Fire TV Stick 5-7 times until it says you are already in developer mode. Press back button once.
3. Then go to Developer Options
4. Then make sure ADB Debugging is turned on.
5. Go to the Home Screen on your device.
6. Go to the Find function at the beginning of the middle row and then click on search
7. Search for Downloader, Select the app Downloader, Download and install the app Downloader. Once app is installed press the home button.
8. Go to settings at the end of middle row. Then go to My Fire TV. Then Go to Developer Options. Next go to Install unknown apps. Click on downloader and make sure it says ON.
9. Now press the home button and scroll down and open the app Downloader.
(Downloader app can also be found on middle row by clicking on the icon with the 3 boxes and plus sign and then finding it in there. It may be all the way at the bottom)
10. Move the cursor to the top, in the box where it says enter a url or search term, type in **2388386** and press go.
11. File will automatically start downloading. After it downloads, go down and press install to install it on your device.
12. After it installs, press open.
