

Update on Hero/Real-time reporting

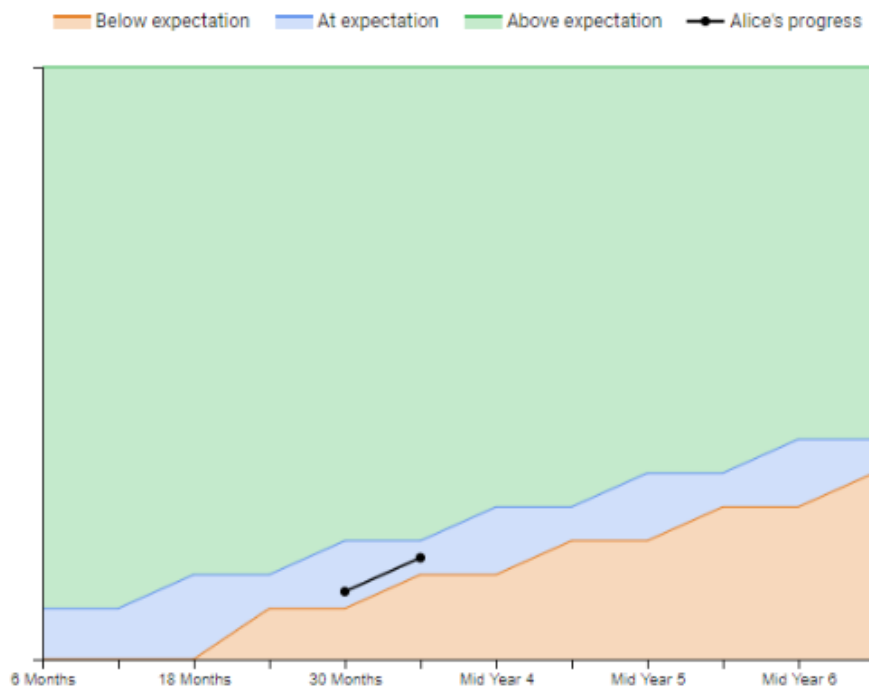

In response to our shortened time at school in Term 2 we reduced the expectations for the number of comments that were added to Hero and focused on getting the children settled back into school. Year 4-6 will be receiving general comments and progress statements against the expected curriculum levels at the end of this week. Year 0-3 have continued their anniversary reporting cycle where the children receive their general comments in the month of their half year or year anniversary.

For Term 3 we will be returning to our usual reporting cycle. The children will receive 6 comments throughout the term. There will be at least one comment for reading, writing and maths.

In response to feedback about the progress wheels being hard to understand, we have now changed what you see to include graphs of the children's progress. These graphs update at mid-year and the end of year for years 4-6 and for year 0-3 at their mid or end of year anniversary.

Number and algebra Progressions Progress

The current expectation for is: Beginning Level 2 (Early Stage 5).

The graph will show you the expected level your child (black line) is working towards (Blue section), if they are above expected level (green section) and working towards expected level (peach section).
