Overview

Geometry Support is a class that is designed to help the student with his or her Geometry class. Students will come to Support class, and we will go over questions that may have popped up in their Geometry class. We will also be working with an online program called ALEKS. Students will take a diagnostic test on ALEKS, so that we as instructors can get a better understanding of the areas in which they are struggling the most. We will then plan our instructions to meet those needs. Students will spend most days on ALEKS working on the skills needed for Geometry. The other days of the week, students will either work on topics that they are covering in their Geometry class or practicing skills that are needed to help them be successful in the field of mathematics.

Tools/Materials Needed

- TI-84CE Graphing Calculator
- Spiral art sketch book or composition notebook
- Black Expo Dry Erase Marker (donate to class supply)
- Geometric compass
- Pencils & highlighters

Expectations

- Students are expected to come to class prepared every day and ready to work. Students will get out of this class what they put into it. This class is meant to help the students, but only if they put forth the effort each day. Students can come to class every day with questions that they have, and I will be more than glad to answer them.
- Students should be on time every day. We only have 45 minutes each day to get as much work done as we can. Too many tardies to class will result in lunch detention, followed by administrative discipline if the problem continues.
- Give me your absolute best.

Google Classroom Code: c3qsms2i

Pack Pride: Be responsible. Be resourceful. Be respectful

- Arrive to class on time.
- Bring your supplies to class.
- Sit in your assigned seats.
- Keep your phones in your bookbag.
- No food or drinks in the classroom.
- Use the restroom between classes and at lunch.
- Use school laptops, computers, and other school property correctly.
- Stay on task.
- Keep your hands to yourself and on only your own belongings.
- Clean up after yourself.
- Do not interfere with the learning of any student

This class is designed to help you succeed in Geometry. What you get out of it will depend on the effort you put in. I am here to support you, and I want you to be successful in Geometry and throughout your high school math journey.
